

F=TVS_r Equation for intelligence

a21

<https://0x8.ch/HackersCardgame21>

Inventor: Alex Wissner Gross
Year: ~????
In my opinion hierarchical systems are bad (a13) so there would be alternatives, for example the equation you see in the title. For example this algorithm would provide that no sheep gets lost (m68) if one would implement it in society, social systems, facebook, twitter...

I studied Computer Science some years but for me it is to complicated to implement it.

Really great work, but maybe you could work on your Entertaining Skills and see a fashion consultant, but i've only seen this one video, maybe i'm wrong.

Access Based Enumeration Part 2

Access-based Enumeration

Access-based Enumeration: A table of files or folders that the user has access to. This will not display illegal folders. Access-based Enumeration will not access-based Enumeration on this shared folder.

With technology in reach
TCP-IP 4.4.0, it would be complicated
become much more complex.

Year: ~???
Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. If you would implement that on a client computer, you could do much more dirty tricks.

For example if a Pedophilia Victim, a Torture Victim or a Victim that was Subject to illegal Human Experiments would find out who did that all to him they would maybe want to keep the victim silent. So they would upload for example pedophilia images on the computer of the victim, call him a Terrorist for getting access to his computers, and would find the pedophilia content. If the Victim would look at the same Folder on his Computer, the Access Based Enumeration algorithm would hide this images, so he would not know and the jury (m37 card) would judge the Victim of Pedophilia when he was 10 years old, the would help to hide the illegal human experiments ...

Design Patterns are well known in Software Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of design pattern too)

For example the Jus Primae Noctis Card (some sort of psycholog design pattern) some assholes use to forced her own daughter after they attract me with a computer course and then they used this permanently changing design pattern over a period of 20 years to snipe me away from the things i was doing in this moment. That is the prove that there are "white"-torture design patterns Julian Assange talked about at HITB SecConf 2009 Malaysia...

pop stack ArrayList(TODOs)

```
ArrayList al = new ArrayList (a.length);
for (int i = 0; i < a.length; i++)
    al.add (a[i]);
return al;

// Useful until java 1.5 -ghuang
static public int[] toIntArray (ArrayList list)
{
    int[] result = new int[list.size()];
    for (int i = 0; i < list.size(); i++)
        Number n = (Number) list.get(i);
}
```

As soon they have your TODO list they start to write psychological warfare socio-psychology design patterns for that specific todo. Lock this item on my TODO's list until this malware is finished and they use it as "additional selector" which seems to be more some sort of booby-trap to hunt down innocent people that are brave enough to speak out against satan.

fear detection

m57

Inventor: xxxxxx
Year: ~????

with Neurosky MindWave you can read attenuation or meditation, so we guess one electrode (t1 card) would be sufficient to extrapolate for example also the parameter fear. And if they would show something like eAPI Card on eg. Facebook stream and would find out that the victim gets paranoid on fears that they would loop such scenes until the victim tries to commit suicide or runs amok. So this card would be an important element for eg. co6, bo1 or a16 card, since the offender does not only want to own or kill the victim, the group would feel good when the victim is revictimized, so the real offender would play m37 card on the group for later using the dt1 card against the group, normally if you could prove that the offender he says something like "it's just training", "we only want to help" and a lot similar lies, so question if one of the offender says "it's just training", combined with m54 Workaround: Listen to music you love, use wireless headphones to not disturb my neighbors. I guess the music makes it harder for detection algorithms to identify emotions.

Porn

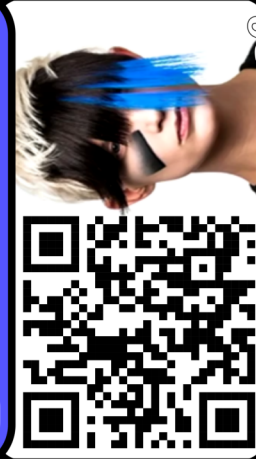

m12

Inventor: xxxxxx
Year: ~????

Reproduction (therefore sex) was vital for preservation of the species. This early Part of brain has influence to individuals. If your NeoCortex, doesn't know about Vulnerability they can easily psy-backdoons you, for example sell overpriced cars by simply putting a half naked women on top of car (eg t1 card: "The woman ins inclusive") Limbic system, is responsible for processing emotions & instinctive behavior. **Sexualitätsdispositiv (Michael Foucault)** Can drive people to do things they would normally not do. A healthy and consensual sexual life is maybe even good for the Endocrine System. **The old People play such cards (and obtusate with mos2) mainly to obtusate technology cards, especially if we find prove that would bring the older to jail. Websites like Youporn should only allow kosher (BDSM)-porn, one could implement that with initial scene where the slave agrees with that will happen and a scene after the act where she / he says that everything is ok.**
