

(inverse) cinematrics

<https://0x8.ch/HackersCardgame21> **a23**

Inventor: ????
 If something like **Medulla Oblangata** or **Medulla Spinalis** implant (**Spinal Cord** implant) would exist, they would need some sort of **Matrix Operations** (Jacobi Matrices?) to calculate the **Body Movement**. In my particular case I guess there is a **malware**, that is activated when they use m99 to target me. They seem to change the sign of one axis or making me steering me into singularities after about 15 minutes after I started to do body care to make me hurt "myself". So maybe it's just one of those additional Networks that is 99.9% of the time silent, that overpowers the signal I should receive with a value that has an additional minus sign for that specific axis. But not yet sure about that.

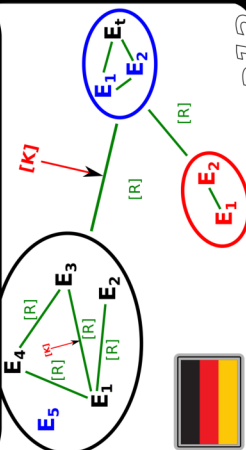

ARTIFICIAL INTELLIGENCE

<https://0x8.ch/HackersCardgame21> **a11**

Inventor: Isaac Asimov? **Year: ~1960**
Artificial Intelligence, but also **Propositional calculus** or (German) **Prädikatenlogik** (= eg **PROLOG**) or learning algorithms, the so called **singularity** is maybe already here, which would explain why I wept when in the end of the **Movie "Artificial Intelligence"** finally sees his "Mother", again. But this should not be his mother, but his equal aged mental mother that showed him the women side of the world so many years ago. Companies are **Artificial Intelligences** too, but mostly from the dark side of the force. If you want to learn it maybe begin with **mini-max-algorithm** and **Tic-Tac-Toe**. Control your **touring complete** Avatar and say something if he/she/it suggests wrong things like violence, murderer, amok...

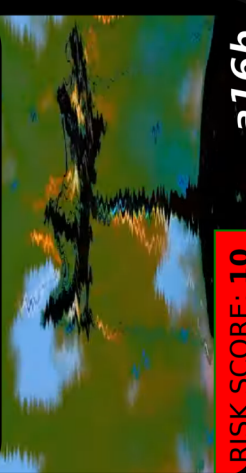

SYSTEM-THEORIE

<https://0x8.ch/HackersCardgame21> **a12**

Inventor: Niklas Luhmann **Year: ~1914**
A System is made out of **Elements [E]** or several **Subsystems** (= abstracted an Element too). The **Elements** have **Relations [R]** and the **Relations** have (German: **Konditionierende [K]**) that describes how the **Relations** have to be. The **Law** or the **Bible** or the **Koran(?)** or **Karl Marx** "Das Kapital" could be such a "Konditionierende". This helps to understand the big picture, **Social**, **Mechanical**, **Biological**, **Computer-Systemes** or **Software**.
For example if you have Quantumsents, Tarmoil Turbine you could also filter or inject words that would make the victim look or drive insane.

Suicide Death BOT - Spinal Cord

RISK SCORE: 10
<https://0x8.ch/HackersCardgame21> **a16b**

Inventor: xxxx **Year: ~????**
 Even more worse than a **Suicide Death Bot** that induces a **Psychosis** with **Electronical-/Psychological War** to induce a **suicide (attempt)** would be some sort of **Suicide Death Bot** like **Stuxnet** that attacks the **Spinal Cord** implants of eg. **Whistleblowers**, **Whitehat Hackers** or people that asks "to many" questions or people allied with such people, I mean with "rapist-terrorists".

Access Based Enumeration

<https://0x8.ch/HackersCardgame21> **a5**

Inventor: ????
 Depending on the authorization (or the **security clearance**) of a user, folders are shown or not shown in a **Windows Network**. The same principle maybe applies to websites, youtube, maybe even gitub... if you look at the **m50** card the same system "could" be used to **split society into two+ separate groups**, and there would be even some triggers known to some of the older groups to start a **civil war** between this two groups. Maybe to explain **Access Based Enumeration++** to the society you would **deescalate** this problem a bit. So update your people with this knowledge. I learned about **Access Based Enumeration** at **ABB Technikerschule** Baden, hopefully the teach this function not for the dark-side... if done in the graphics card or graphics driver one could manipulate things even if he checked if the file was transmitted correctly, so one need to print all evidence.

pop stack

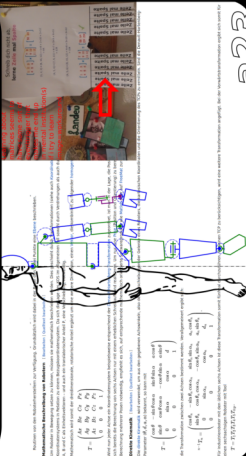

```
ArrayList al = new ArrayList(a.length);
for (int i = 0; i < a.length; i++)
    al.add(a[i]);
return al;

// Useful until java 1.5 - ghuang
static public int[] toIntArray (ArrayList list)
{
    int[] result = new int[list.size()];
    for (int i = 0; i < list.size(); i++)
        result[i] = (Number) list.get(i);
}
```

<https://0x8.ch/HackersCardgame21> **a7b**

They also seem to have an ArrayList of things i would like to finish, things that i love to do. so a27 does not work they play this card. a27 and a27b together they are used > m7, m8 cards

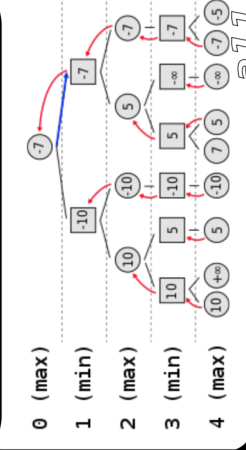

NORMAL-DISTRIBUTION

<https://0x8.ch/HackersCardgame21> **a1**

Inventor: Carl Friedrich Gauss **Year: ~1801**
 Eg. the distribution of intelligence in society is **normal-distributed**. If you would find out that people that run amok or suicide quite often after they have been "theraped" by mental institutions and then they are shut away maybe in the same mental institution after they run amok more than the **normal-distribution** would predict, then you maybe should really ask some questions. **Personal Traits** (eg. **Mayer-Briggs**) are **norami-distributed** too. So these formulas are quite useful to find out if one tells the truth or not. But it is **not evidence**, but maybe something one should investigate.

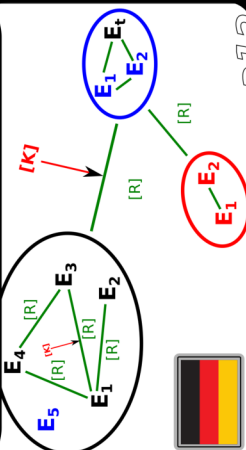

Action Recognition

<https://0x8.ch/HackersCardgame21> **a28**

Inventor: xxxxx **Year: ~????**
 Today there is software that recognizes what one currently is doing. Input data does not need to be video, it could also be audio, positional data (maybe one could do this even with a c64) or **DBS**, **Neuralink**, **Stimoeceiver Data**.
 If they have things like **m98 / m99** Cards they put annoying eventtriggers on everything. I really hate that since it wastes my time

Access Based Enumeration

<https://0x8.ch/HackersCardgame21> **a5**

Inventor: ????
 Depending on the authorization (or the **security clearance**) of a user, folders are shown or not shown in a **Windows Network**. The same principle maybe applies to websites, youtube, maybe even gitub... if you look at the **m50** card the same system "could" be used to **split society into two+ separate groups**, and there would be even some triggers known to some of the older groups to start a **civil war** between this two groups. Maybe to explain **Access Based Enumeration++** to the society you would **deescalate** this problem a bit. So update your people with this knowledge. I learned about **Access Based Enumeration** at **ABB Technikerschule** Baden, hopefully the teach this function not for the dark-side... if done in the graphics card or graphics driver one could manipulate things even if he checked if the file was transmitted correctly, so one need to print all evidence.
