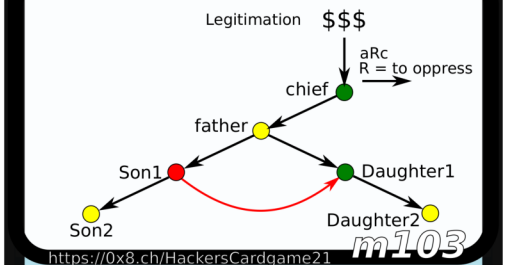
INK BLOT TEST FIXATION

https://0x8.ch/HackersCardgame21 **m1**

Inventor: Hermann Rorschach **Year:** ~1900

Sold as a "phantasy test with formless blobs for children, normal adults and for mentally ill", in fact it distracts the questioned (fixation) so he not focuses to much on the questions. A Hack would be to add an eg. RFID or LC circuit on the backside of the paper and to activate small Active Denial Systems or Hum Noises or treble Sounds arround 15'000Hz below the conscious perception threshold to let the questioned act as a liar since his face would show stress because of the active denial system that was activated. Using an inkbolt test als "Lie detector" would therefor fail in some cases.

Transitive relation (mathematics)

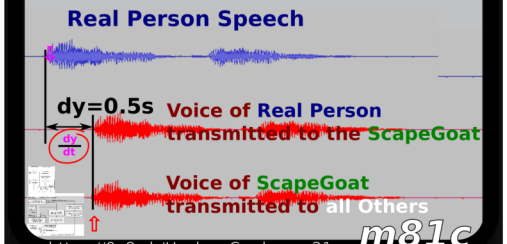


https://0x8.ch/HackersCardgame21 **m103**

Inventor: Satan **Year:** ~????

Sons have often problems with their fathers. Fathers often bully their sons, they abuse them, torture them, attack them (no matter if physically or verbally) After a while the son is old enough to defend himself, the justice system is norally not very interested in this things, but this causes the sons to become evil, maybe learned this behavior from their father, and are doing the same to younger people because they learned that it is "legitimate" to do this. In some cases then the father would punish the oldest son (son1) even more because he does the same to the younger son (son2), unsure if just reason to **punish a weaker like the chief does** or really wants to protect the youngest. (Bigger Domain Model: Money beats m72 Card, m72 card beats unfortunately m24 card). maybe in conjunction with mos6 or mos2 card
This behavior (psychology: introjection) then would be the normal case and would feed problems into the wohle social systems (also m102 karte) and finally hits also daughters too

Deep Fake Speech Synthesis with multiple Avatars



https://0x8.ch/HackersCardgame21 **m81c**

Inventor: xxxxx **Year:** ~????

I guess there are some algorithms that are abused by $Shrink and $herFather:

i often hear $herFather saying:
"**Activate Booby Traps against Marc jr.**"
but all the others would hear the same but with my speech synthesis and therefor they think that i would be the offender not $herFather.

With deep fakes for speech synthesis this problem is even more worse, but one can identify the real offender with **Natural Language Processing**, **Code Fingerprinting**, **Psychology Fingerprinting**. Autistic brains do this maybe automatically, but not yet 100% sure about that.

Kibitz sample since ~2002: Terminator 2, Fake voice, Auffrischungs"Spritze", Pivot-Element?

ICD 10 F44.x Dissociation

https://0x8.ch/HackersCardgame21 **m108**

Inventor: xxxxx **Year:** ~????

To set people to freze mode or maybe even remote control them, "dissociative identity disorder". "Identity" would acuse the victim on the psychological layer. After they used it they start electronic psychological warfare to obfuscate that i've possibly just been dissociated. If you search the Internet you will often find sources that say, that Dissociative Disorders come from PTSD and from beeing raped in early childhood, but this would be mos4 card to obfuscate **Neuralink Implants** and to defend and hide the *EVENTTRIGER* **Neurologists** that implemented them. **I used "defend" because it is not clear to me** if these people are good or evil. EVENTTRIGGER Neurology Implants: *cAPI $herNo1* *Disso Patientinnen würde mich unter Disso vergewaltigen* (victim blaming)... -> Transitive (math) Concept: The death of the topmost would drive the whole group to commit suicide. Maybe intentionally to defend this such a "Hitler"? One shuold not build such systems, this would be some sort of terrorism.

Algorithms for Automated Psychological Warfare

https://0x8.ch/HackersCardgame21 **m112**

Inventor: xxxxx **Year:** ~????

See: Mein Bot der Kombatant, **PART2** https://media.ccc.de/v/31c3_-_6184_-_de_-_saal_g_-_201412271715_-_mein_bot_der_kombattant_-_josch_-_arche3000 There are algorithms, that create psychological warfare "stories" based on BigData and are transmitted over eg. Neuralink or US4877027. For example if I Google "Ian Murdoch, suicide, pedophilia". With Data about your first love and the society you lived in, they can render image and voice content. For true people that both promised eternal faithfulness they would show scenes where one of both becomes untrue. Sort of Jaro Winkler Algorithm matches nearest scene in Bigdata, making you think it is real. Even if both kept thier promises, synchronized activation of Active Denial Systems or Amygdala implants makes me aggressive or drive me to commit suicide attempt. "Successfull therapy" would mean that would i break the promise i gave her, but this would maybe kill her. Combined with or without **Medulla Spinalis implant hacks**. This algoritms seems to create as much hate in the country/society occupied as imaginable ⇦ corrigere!

Revenge Porn

https://0x8.ch/HackersCardgame21 **m104**

Inventor: Satan **Year:** ~????

I would not do revenge porn, i would just commit suicide, and i guess all true christians would do the same, or if they would have autism they would commit suicide too.

But the relation between the two or three people would just obfuscate that the whole revenge porn story just obfuscates that they try to produce *cAPI* *FU* people that run suicide or even amok. So it was a good decision 5 Years ago to delete revenge porn. Or would maybe also obfuscate that the Father *cAPI $herFather* of the girl that was betrayed, or that was thinking that she had been betrayed is pedophile *cAPI RevengePorn* and just wants to force his daughter to kill the boy that was untrue, or if it would just be photoshopped or deep-faked prove that the boy was untrue.

Skinner-BOX & Leben(ger), Part 2

https://0x8.ch/HackersCardgame21 **m70**

Inventor: xxxxx **Year:** ~????

IMHO, **cars are Skinner-BOXes** too. A lot of electronic Equipment in a car. People that uses a Car are beeing programmed while driving, this is suboptimal anyway. So we need to declare all Car Drivers to **MKULTRA Killers** as long one can not proove that he is not. $herFather knew about that, he said in 2002: "All Cars with Antennas are remote controlled" This would mean since he kept this secret he is partitially responsable for all People died in Car Accidents. He used this knowedge to show-off "his greateness" to his daugther but not to save the victims. **MKULTRAs would get some benefit for driving a car, some sort of m15 Card**. So the Term "**Car Hacking**" is also an overloaded Symbol. Technically it would be some interface the user that uses the MKULTRA would not know, t1... Card and eg some personalized map where the MKULTRA Bot would get the **Stimulus: Go to place 23. My Father sold my car, i feel better now and it's**

Simulations-Waffen cyber weapon

https://0x8.ch/HackersCardgame21 **m155**

Inventor: xxxxx **Year:** ~????

In Switzerland they seem to have some sort of simulation weapons like sniper rifle that is attached to a mainframe / GPS. There they can virutally headshot people like me. If the virtually killed me my DBS-Implant / neuralink / spinal cord implant beats my fists against my own head, therefor an helmet for autists is helpful. Other victims seem to cut theirselfes, run suicide or amok. I don't know how and when i got the implant, but first time that happened was in $herParentsAddress 6 Aarau. (m75 Card). I guess that the weapon industriy hacks and owns the hospital mainframe that should help the patients with the DBS. Thats against the geneva conventions. The Offender that uses this weapons seems to get incentives. The system records that and blackmails the soldier with that deed. Finally the use the Offender as assesin like a chat friend from syria reported bevor the war begun. Logischerweise zwingen Täter wie $herFather so z.B. Minderjährige zu "einvernehmlichen" Sex.
