

Zombi/BOT Broadcast "maybe" Personalized

 The Zombies or Bots seem to have some sort of Broadcast Message Function that makes them storm the place where the young people that don't want to sell their soul to satan are. Eg. in Shopping Malls, Parks, almost everywhere. The Zombies seem to dislike rain and are allegedly mostly Cyber-Raping kids during the night, so doing your bicycle tours at night is (at least as a man) thereror a good idea. Broadcast message that works that good would imply that they trust their neuralink interface, because it leads them to "food", CC: OpDeathEater"

 IMHO "Headshot" just means to explain the Zombies in the situation (Situation Hacking) what they just cause.

Cyber red pen

 I guess there is some sort of electronic red pen where the offender can change things in text I wrote. The principle is quite simple. For example writing *TERROR* all over the text and then additionally activating an Active Denial System / Amygdala, one would not be able to read what the person who wrote the original text would like to say. Not tested so far. Workaround would be to use color your own in the text you write, it then would still be possible, but much harder for those that uses this dirty trick.
 Technically one could implement that with things like t1 card, or if you would know how many words a person reads per second you would for example send the word you would mark with a high frequency sound just above auditory threshold... or you could add a blinking effect around the children in grammar or orthography, bad people possibly use it for the contrary effect or to make important texts like protocols in criminal cases unreadable.

 I guess there is some sort of electronic fluorescent pen where the offender can mark things in text I wrote. The principle is quite simple, i guess one could make terror, threat or a death threat out of every single page out of the bible if one would mark some words on the page. Not tested so far. Workaround would be to use color your own in the text you write, it then would still be possible, but much harder for those that uses this dirty trick.
 Technically one could implement that with things like t1 card, or if you would know how many words a person reads per second you would for example send the word you would mark with a high frequency sound just above auditory threshold... or you could add a blinking effect around the perceptual threshold, if done directly in the hardware, graphics card or even in the screen it would be quite hard to prove that. SSC BDSM

 Save Sense Consensual with Attitudes helps to cope eg with rape and to think about own body/sexuality (pain, NOT violence!) to understand mechanisms behind it with ONE faithful mate in the same age, if you would betraying your mate, pain-game would change into violence and then suicide or even things like amok would be likely! To help eg, rape/pedophilia victims to get healthy again (takes **decades**), as well as for big "children" to understand this part of the psyche. Also helps to find out if parents educated them or trained them like a dog. <insert>At least one Medic **MUST** be around when doing only SSC BDSM, otherwise it would be irresponsible! Knowing about Anatomy maybe helps to make the Slaves feel more PAIN/insert> Google "NSA Porn Room", you would maybe find out that they use the sexuality as vulnerability, patch vulnerability, NSA(CIA is non-consensual exploiting this vulnerabilities. So BDSM would maybe fix trauma, see also reprogramming. BDSM in Groups and with a lack of Moral, and values would end up in hate, violence or worse. In this case it is used to train, **ml at1 cards**.

Death Circle of Live

 There are some sort of Death Circles in many subcultures (m37 Card). The circle can be out of individuals or out of companies / Juristic Persons (Mainframes)
 For some kids it is just gamification and fun
 Some kids really think it would be good to kill the whistleblower / whitehat hacker, because the parents show them the fake image of him cyber-raping innocent women on the "inner eye" (level, t1...) and enable an active denial system (t15, b1, t1) against the kids but in fact he does not cyber rape anybody. Some kids think it's just some lesson for the Hacker for not become Hitler, or to help him not to become to powerful, "Scherbengericht" Some kids just play because they fear being under attack too, as long as they are younger than "the one" this is ok. Unfortunately the PsyOPs kills 1 out of 80 and then dt1 card is played against the circle of kids and also against the parents circle to make them do what Satan want them to do.

CIA/NSA seeds Information(s)

 The NSA / CIA leaks stuff himself. But not the whole story, only a part. For example Equation Group Malware (e6 card) or CarniWare "Software" (co3 card) They use that as some sort of HoneyPot to find out what people know about that sort of stuff. If one tweets additional things (even if it are only hypothetical things) they put him into a mental institution and erase his brain with "anti" psychotics. In the hope all people would not talk about that anymore. This should make him & them make fear the stupidity um power of the Secret Services. If a person would be autistic, then this would not really help, because questions must be answered.

the sum of psychological keys is constant

 In Swiss Law the Article STGB 185 should prevent that captors own and enslave people. The Article also should prohibit that people are enslaved with psychological tricks.
 Trauma that are theraped can not be used anymore to make eg. young people do what the older people wants them to do. Trauma seem to be activated by an order of images, voices... they can be theraped, but if the Schizophrenic Person that is in some cases a victim of an STGB 185 is free (not as in free scenes and the image or voice sequences that activated the trauma is then re-rendered. FHA 2002: "Die Summe der Fehler ist konstant" After the sequences are re-rendered, the victim could again be triggered with the same keys, except he/she knows this dirty concept. 3 Months in a Mental Institution renews all keys that should not exist at all. After i released card PsyOP started loop "Marc Jr Parents are Pedophile..." to spam this information(s)...

SocioPsychology RootKit for Mental Institutions

 Situation in H7.2 Mental Institutions are a few older patients that tries to make the young patients more psychotic to make it look more legitimate to give them Anti-Psychotics. There seems to be one Master-Pedo-Patient that commands the other pedo-Patients. They also influence the other psychiatry nurses maliciously (making the nurses angry on the young patient, bl&st&t Card) that normally ends up that the young patient is being forced to take intelligence-reducing drugs.
 Just in case im Right with this card, it would be important to find all the young patients that got victim of such a "sunderstetting (german) and help them with equalaged good people.
