

simultaneous "Chess" "Game"

m120

Year: ~????

Inventor: xxxxx

-> Title
 maybe one could derive the size of the attacking group by the size * 10 of the defending group

or maybe one could derive also the size of the attacking group if the defending group would count the number of the "You son of a b****" per Minute

Morality

m24

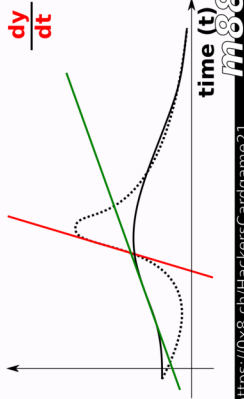

Year: ~????

Inventor: xxxxx

Morality generally refers to the actual action patterns, conventions, rules or principles of individual individuals, groups or cultures. It would be better to say norms, values, categorical imperatives, which serve the general public as well as the individual, the counterpart to egoism.

To keep the system stable and create sufficient reserves, so that it does not break, if something small goes wrong and / or become Sodom & Gomorra (Hebrew גומורה and גומ).

avoid big system-changes in little time

m88

Year: ~????

Inventor: xxxxx

Big System-Changes in little time seem to cause problems. For example if you would have mos2 / mos3 malware cards installed on the whole and one would just leak the whole blueprints how this system works, to stop it, it would drive the criminals run amok or suicide. So do such changes slowly (dy/dt). The area below the curve (integral J) would still be the same, but the chance that people guilty people run amok or even kill their victims that can not do a testimony is smaller. The criminals use it exactly the opposite way for targeting whistleblowers, whitehat hackers, victims... they for example link you have fun and are lucky that you are not alone, gives you full communication with and the suddenly drop the scenes in reverse", especially that what helped you stable and feel good (m77 card) and then start a virtual simulation (multiple L21 cards) that destroys all these good scenes (m57 card checks that) and then loop the bad things (t10, t23 t32, m54) and start (co6,a16, at1...)

carrot

(German: Zuckerbrot)

m8

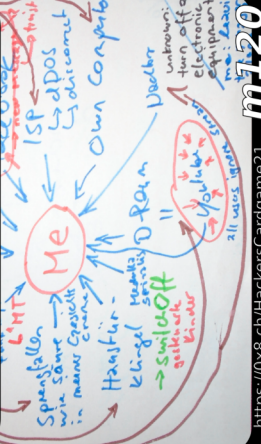

Year: ~B.C.

Inventor: God

German: Zuckerbrot und Peitsche. The Brain tells "child", you have to eat that again (because sugar has a lot of energy) so you want more sugar/carrots. Unfortunately, it is also possible, to use the carrot (or maybe money) to lead the child into the wrong direction: for example, if someone would reward it, if brother pulls the little sister at her hairs, this would be bad stimulus-reaction-habit too. Parents who would do such crap would deny the existence of Behavioral "Sciences"...

You get sweets almost in every store, so the kid learns early to consume at the sugar-armed salesmen that would argue, that he is Zacchaeus, chief tax-farmer and would claim that he is entitled take the money for carrots.

Brainbased Mind Control gunshot noise to add Permanent Record

m21b

Year: ~????

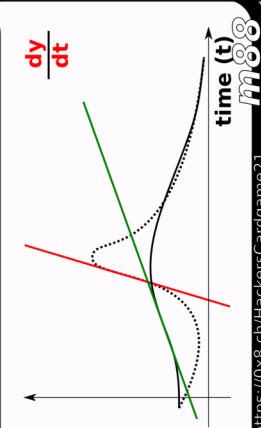

Inventor: xxxxx

Arau seems to have a gun-shot noise detection that has multiple functions and seems to be widely abused against me -> KAPO AARGAU? -< FEDPOL

1. Detect gun-shots
2. With forced neurosis "smoke now" they send victims outside to smoke and then activates the induct cough function to locate the victims for hunting them down or add protease calculators for them (disabled 2001, \$herFather is a bad police officer that is already a murderer, obligatorisches schiesst?)
3. to enter permanent records into the mainframe to the 3D Model of victims

Technically: Vector Algebra and many microphones in the town

Mental Institution

m19

Year: ~????

Inventor: xxxxx

The Concepts often as medieval as in the times of the Inquisition, but with a very modern backend. Actually, torture of victims and witnesses. Offenders often talk about behavioural "sciences" or "Therapy". Elektroschocks, Insulinschocks, aggressive medication, even lethal medicines like Zxpreva (exposte by The @torproject ♡) are unfortunately not seldom. They obfuscate crimes, rape, murderer best known example list the case of #Wolath (Honeypon) Germany, maybe not even for profit and just for more obfuscation. CIA MKUitra Project < DSM has parallels since at least 1970 and if you look at the English Wikipedia article of Even Cameron you will find Burghölzli in Switzerland. Some people call the act of being thrown into a mental institution as a nasty, nerve-racking (Quake) Enemy Terrorist "Game". Another less nice thing is, that they go against the complete family and social system (co7 Card) annoy them in the name of the patient that would just isolate him more that would lead to m32, m46 or even at1 card. Telling the patient "we will help you and calling it "therapy" is "maybe" not completely fair game.

Adaptive learning- algorithm that adapts places to hide

m145

Year: ~????

Inventor: Satan

Patients that takes their drugs tend to be remote controlled. The algorithm that controls them seems to learn and adapt the places where I try to hide so that I can work without being bugged. In Königsfelden they always know where the patients are, otherwise they could not bug me permanently. Maybe eye card or maybe something like implanted RFID and the uplink eg. the fire alarm system. Unfortunately **tempering with the fire alarm system** would be a really really bad idea, but maybe we could order the same system as they have here in Königsfelden to temper with... worst case it's not a default system and has unknown additions, in that case I guess in the Workshop near the railways, they maybe have some unused parts...

"Enlightenment" with Drugs

m95

Year: ~????

Inventor: xxxxx

When I was 20 Years old 3 "friends" used peer pressure over a period of 6 months to make me consume Ecstasy in our Music Studio below a (stereotype) Gym. We also watched the movie "The Matrix". In the end they succeed. After that Scene the t1 card told me, that I now must "enlighten" also the equal aged Girl Rahel Sc. (they wanted me to fork, so I would have been guilty of ruining someone's live too and then I would not leak all this informations) but I did not want to put it did not. Then the t1, t2, t6, t11.. Cards also told me to put some XTC into a bottle in my parents fridge. I did almost, but I did not. I guess the suggestion they used was, that my parents have a less technical / scientific background, so I wanted to "enlighten" them as a gift. It was even the same substance I already consumed, so I was not thinking about that I could have poisoned them, but I possibly would. **Relevant: intended / implemented to fork to other people, so Switzerland's Society is under attack since before 9/11.**
