

Action Recognition

https://0x8.ch/HackersCardgame23 **a28**

Inventor: xxxxx
 Year: ~???
 Today there is software that recognizes what one currently is doing. Input data does not need to be video, it could also be audio, positional data (maybe one could do this even with a c64) or DBS, Neuralink, Stimociever Data.
 If they have things like m98 / m99 Cards they put annoying eventtriggers on everything. I really hate that since it wastes my time

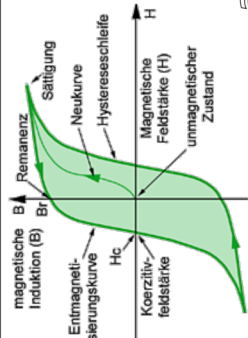

QAM64 Modulation

https://0x8.ch/HackersCardgame23 **a29**

Inventor: ????
 Year: ????
 With QAM64 Modulation (some sort of a complex plane) you could easily transmit binary data over a scalar in time. Brain would possibly even adapt by it's own. I guess there are several such channels
 - Position in Room (X,Y,Z)
 - Positional Data of your body (plane projected to your body surface)
 - People you know or generic archetypes
 ...

HYSTERESIS REMANENCE

https://0x8.ch/HackersCardgame23 **a2**

Inventor: James Alfred Weing Year: ~1890
 Describes the persistence of an effect after the causing force stopped. For example in (electro-)magnetism.
 Old electron tube televisions tend to become magnetized after a while which resulted in a bad picture, so they have had to be "degaussed".
 The same principle maybe also works for psychological effects, see m15, t10, m19, col, m9, t11 or **Clark Hull's Formula** for Emotions.

Black use Cases

For example to burn **bad behavioral** patterns into a Hacker to sue him and waste his time. Time that he could better use to defend younger people from being owned by the CIA

Military Rank

https://0x8.ch/HackersCardgame23 **a3**

Inventor: Satan / Romans? Year: ~500
 People tend to subjugate other people and making them "usable" for their own profit. Globally there are many of such systems that use things like dt1 card to enslave people. Right-Wing people seem to thrive in Military Systems. Maybe not even by their own will but they have had maybe dominant parents and learned that it is liked with less pain if they just do what the older person says. I myself was always rebel and begun early to question things the older generation said. This way I went is possibly more painful since you must defend against the older generation and consider that the younger that help those elders and obey their order attack you from two sides. And it would not be fair to be mean to the younger.

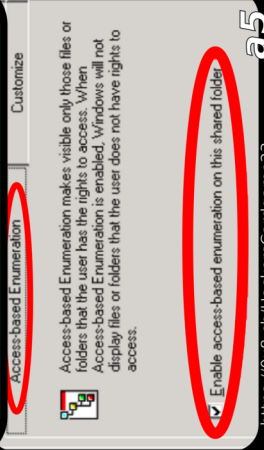

Batch Achievement

https://0x8.ch/HackersCardgame23 **a4**

Inventor: Trevor Paglen Year: ~2010
 Each (sub-)culture has its, heroes, enemies, rites, symbols and "secrets"
 Trevor Paglen "collected" such symbols and wrote a book: **"I Could Tell You But Then You Would Have to Be Destroyed By Me"**. Emblems from the Pentagon's Black World". Find those symbols of common sense and you will find maybe hints to the truth and the whole picture. I'm not sure if such symbols are "The Mark of Cain" or symbolize just a group membership in the real world or in computergames. But being member of a bigger system maybe compensates also low self-esteem, question would be, who caused the low self-esteem initially

Access Based Enumeration

https://0x8.ch/HackersCardgame23 **a5**

Inventor: ????
 Year: ~???
 Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. The same principle maybe applies to websites, youtube, maybe even gitub... if you look at the m50 card the same system "could" be used to **split society into two+ separate groups**, and there would be even some triggers known to some of the older groups to start a civil war between this two groups. Maybe to explain **Access Based Enumeration++** to the society people with this knowledge. I learned about Access Based Enumeration at ABB Technikerschule Baden, hopefully the teach this function not for the dark-side... if done in the graphics card or graphics driver one could manipulate things even if he checked if the file was transmitted correctly, so one need to print all evidence.

OOP CLASS

https://0x8.ch/HackersCardgame23 **a6**

Inventor: Alan Kay Year: ~1993
 The inventor of the programming language Smalltalk was the first who used objects in software development. It was maybe the first Programming Language that used **"Object Oriented Programming"**. Like Gutenberg could print complete books with letters templates one can create bigger things out of such objects. A Class is can be single part of a complete software product. Eg. in an addressbook Class you would have predefined fields for Name, Address, Phone Number... You can also have such templates in Psychology. Mechanic. Simplification / standardisation through predefined templates makes things more efficient but people maybe **lose base skills when using JUST templates**

DESIGN PATTERN

https://0x8.ch/HackersCardgame23 **a7**

Inventor: Christopher Alexander Year: ~1977
 Design Patterns are well known in Software Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of design pattern too)
 For example the Jus Primae Noctis Card (some sort of psychology design pattern) some assholes use to forced her own daughter after they attract me with a computer course and then they used this permanently changing design pattern over a period of 20 years to snipe me away from the things I was doing in this moment. That is the prove that there are "white"-torture design patterns Julian Assange talked about at HITB SecConf 2009 Malaysia...
