

Voice /3D Model over t45 that says that he/she is a COP to make me fear

Since the have threaten me like a criminal, like a terrorist, the police did a lot unfair things i have a PTSD generalized to all Chiefs, Police People, older male People, older female People, I think the intentionally made my PTSD worse with that concept to isolate me so that i can not talk eg. in court. I also fear mental institutions, doctors, even flowers (\$heFamily's name). All based on m75 and the actions against me based on this Array/List<Euphemisms> (t16 -> -> t42)

good thing, at least i did not have to flee 6000 miles from home, or committed suicide like Ian Murdoch

sealing wax Glitter (Bomb)

Old pedo Parents "need to control" what daughters write in their diaries, letters, and of course "they need to control" their daughters sex toys. **Just in the daughters interest**, that's what it claim, but in fact that sort of parents are pedophile. In at least 5% male but have similar issues, they render samples on objects in your apartment. They add Eventing's like: "The open bottle on your dining table was poisoned while you were away", they even render things on things in my bedroom. A workaroud I found is **sealing wax**, if you **seal your apartment**, bedroom, servercase... before you leave, they still render such things on your goods, but if the seal isn't broken you know, they cheat and "just" render it on your goods (Psychological Warfare) The Loop "Neighbour Smith or Brother Dominic was it" would intentionally start a local conflict with a scapegoat that would distract from the real criminals: <https://www.youtube.com/watch?v=y0JA7pKdXkM> **UPDATE**: one day after i released this card they added an eventing on my card that distracts me to break the seal without checking. And drew some sealing wax into the elevator (PsychWAR). This "would be another hint that the criminals are old people with a lot of time.

Algorithms for Automated Psychological Warfare

See: Mein Bot der Kombattant, PART2 https://media.ccc.de/u/31c3_-6184_-de_-saaLg_-201412271715_-mein_bot_der_kombattant_-josch_-arche3000 There are algorithms, that create psychological warfare "stories" based on BigData and are transmitted over eg. Neuralink or US4877027. For example if I Google "Ian Murdoch, suicide, pedophilia". With Data about your first love and the society you lived in, they can render image and voice content. For true people that both promised eternal faithfulness they would show scenes where one of both becomes untrue. Sort of Iaro Winkler Algorithm matches nearest scene in Bigdata, making you think it is real. Even if both kept their promises, **synchronized activation of Active Denial Systems or Amygdala implants makes me aggressive or drive me to commit suicide attempt**. "Successful" therapy" would mean that would i break the promise i gave her, but this would maybe kill her. Combined with or without **Medulla Spinalis implant hacks**. This algorithms seems to create as much hate in the country/society as imaginable => corrigere!

Pre-Detection of euphoria and pain of certain information

The Psychiatrists tend to give normal people only information that causes euphoria and filter that information that would cause psychological pain. Technically this would be Natural Language Processing and Patter Recognition Algorithms. All the sins people should confess and atone stay hidden. It would save lives if people would confess and atone stay hidden. It overateen one single bit of truth about their sins would cause rage and even make the sinners run amok. **This is a military thing**. In Boy Scouts Araur where many armed Officers have grown up the Shrink can pop the all the "bad trips" by using his voice-key "Spontane Enblaudung" and people like \$heFather would run amok **overheim** by the facts that he almost killed Marc Jr. It is even more worse if the shrinks helped those armed sinners to sue their victims or kids. Suing the victim (suing Marc Jr) was therapeutical for \$heFather but in the end the problem just got bigger and forked to the prosecuting attorney, autopolis.

Footprinting your own EEG Data to defend against m112/m113

It seems that they can identify the thoughts or words with the stimociver +70 years or the Neuralink. To get the map or at least to get used to an idea of your map of the content they use against you just think of random things (people, objects, sex toys...) when they enabled the automated psychological warfare. So the system would transmit the objects, vocals and images linked to this specific keyword. Using paper and pencil to draw the map, even pre-printed templates or both simplifies this task.

So they still could enable it, but they would lose their psychological warfare algorithms and of course "nobody" would leak them. So we maybe have some sort of an **Nash equilibrium**.

We "only" want to "HELP YOU"

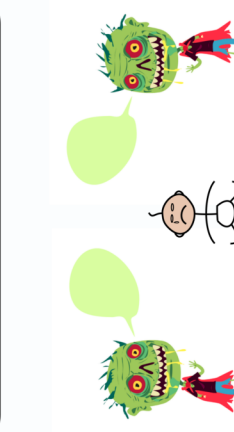

<https://0x8.ch/HackersCardgame23> **m115b**

Inventor: xxxxx
There are "some" drove controlled old people (in my case I mean 1965s and older) that switch to a Mode (co1 Card) where they say to themselves "i need to help this young girl or gal", but in fact they just follow their egoistic desire (m73 && b7 Card) and the nonverbally "let me help you" should obfuscation their victims, but they also lie to themselves because they would actually know that what they are just doing is wrong. **Saying things like "don't run after me" may seem like as a good idea at first, but it is not**. It just makes the zombies more doubtful, and since you seem to have the answer they just get more annoying and stalks you even more, but because they are such "well-behaved" old Pedophiles they setup their hypocritical face: "i just want help you, it's all for your best!"

IMPORTANT, IT IS MAINLY A SIGHT / COMINT PROBLEM, IT SEEMS THAT THIS IS SOME SORT OF ESCALATION FUNCTION IF YOU WOULD LEAK THAT CISSPs WORK FOR NSA (even in Switzerland) AND ARE OWNED BY THE CIA WITH THEIR HABIT TO RAPE YOUNG GIRLS.

Zombi/BOT Broadcast "maybe" Personalized

<https://0x8.ch/HackersCardgame23> **m115**

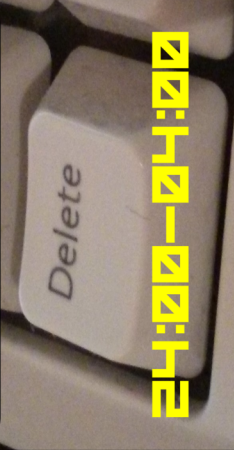

Inventor: xxxxx
The Zombies or Bots seem to have some sort of Broadcast Message Function that makes them storm the place where the young people that dont want to sell their soul to satan are. Eg. in Shopping Malls, Parks, almost everywhere. The Zombies seem to dislike rain and are allegedly mostly Cyber-Raping kids during the night, so doing your bicycle tours at night is (at least as a man) therefore a good idea.

Broadcast message that works that good would imply leads they trust their neuralink interface, because it leads them to "food", CC: OpDeathEater."

<https://www.youtube.com/watch?v=kpS66hysEms>
IMHO "Headshot" just means to explain the Zombis in the situation (Situation Hacking) what they just cause.

nightly erase of relevant information(s) ([global] loop on Neuralink)

<https://0x8.ch/HackersCardgame23> **m116**

Inventor: xxxxx
IMHO there is a nightly (maybe global [generic] personalized) algorithm, that deletes relevant information(s) like sentences (1) from @loeror from the mind of people or at least from my mind. Prerequisites would be lots of data about a persons live, something like Stimociever / Neuralink / US4877027 and specific algorithm that would eg. show an image / stimulus on Neuralink from the scene they would like to delete and causing pain at the same time eg. with b1 Card... if true and one could record what they try to delete we would maybe then know how more how they manipulate the world. **Yet another Nash Equilibrium...** [1] **Basically the NSA (MarCjr: bidirectional), and if want to be able to spy on you (MarCjr: AND CIA), they have 10 different options for spying on you that you know about, they have 13 ways of doing it and they do all 13. (MarCjr: at the same time)**
