nightly installation of irrelevant information(s) ([global] loop on Neuralink)

IMHO there is a nightly (maybe global [generic|personalized]) algorithm on the Network / Mainframe, that installs irrelevant or false information to your brain. Or it primes (Priming [psychology]) you to buy crap you don't need. The next day this installed information is recalled and makes you buy spontaneous crap you don't need.

Prerequisites:
- (Global) Network
- Stimoceiver, Neuralink or US4877027... (t*, b* cards)
- psychology knowledge (eg. p1, p7 card)

The Psyche of 1980s+ people normally survive withtout all that junk like Car, House, Garden, traveling around globe... Everything i need is **equal aged friends**, food (potatoes && eggs = **all essential amino acids**), cheap vitamines, **working** Laptop && Bakbone && Mainframe, maybe some SexToys, a private place where i can live, recharge and sleep, medical care and the girl that promised me to be true forever

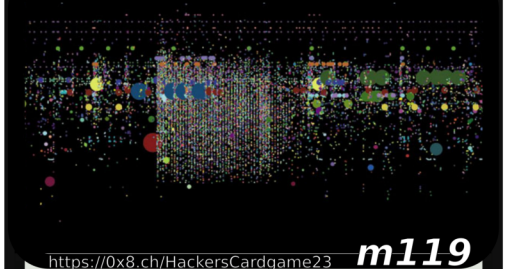
Borg Hive Frequency Scanning (injection & bursts)



https://0x8.ch/HackersCardgame23 **m119**

Inventor: xxxxx **Year:** ~????

There is a scene in Star Trek, where the federation tries to find frequencies of the borg hive, i don't like Star Trek because it are Military Dressed Soldiers that promote hierarchical systems, but this is a good scene. So if you would imagin, that many people already had some implants like neuralink, that then the process to find a user would be some sort similar to that Star Trek scene. In real world it would maybe more complicated, since it would be a many to many relation. Many sources, many sinks. Simple domain model: If you would take analogue devices one could listen or easily inject things. For example if i would say: "I love you $onlyGirlfriend", $herFather would inject "Sprengfallen gegen Marc Jr aktivieren", if he would do this with small bursts, different antennas it would be hard to deactivate that Terrornetwork. A big Problem would also be, if the are backup systems that are 99.99999% of the time silent, eg implemented as Autonomous system (Software). Things concerning Tobias Moser (m37) seems to be such a backup trigger: cAPI::Moser loop{"$onlyGirlfriend betrayed you with moser" && t15...}

Mental Operations

Mental operations are operations that affect mental contents. Initially, operations of reasoning have been the object of logic alone. Pierre Janet was one of the first to use the concept in psychology. Mental operations have been investigated at a developmental level by Jean Piaget, and from a psychometric perspective by J. P. Guilford. There is also a cognitive approach to the subject, as well as a systems view of it. **Developmental view:** Seriation, Transitivity, Classification, Decentering, Reversibility, Conservation. **Psychometric view**: Operations dimension, Content dimension, Product dimension, **Cognitive view** ...., **Systems view**....

maybe one could derive the size of the attacking group by the size * IQ of the defending group

or maybe one could derive also the size of the attacking group if the defending group *would* count the number of the "You son of a b****" per Minute

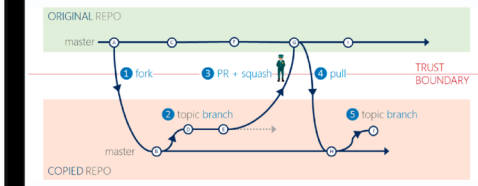
Blessings (eg. Ultra-Violet or Acid Burnings in Face)

https://0x8.ch/HackersCardgame23 **m121**

Inventor: xxxxx **Year:** ~????

IMHO the criminals use Violence, Posion, Acid and such things to distract people like me that asks "to many" relevant questions. if i am confronted with a burned face they transmit a lot of missinformation(s) that is "used" later to steer me into a wrong direction. It makes also paranoid, depressed (m94 card) and **causes me to concentrate less**. I guess they did this also with the people that asked questions if i'm the bad guy, and that led them think that i am the criminal, since they question me and are "therefor" beeing attacked, then it would completely make sense to belive that i am the offender or the criminal. But just saying "burned face" = innocent would also be wrong, see a14 card. unknown: at least 3 "use cases" for violence
a) violence against people that question a scapegoat, would make the scapegoat look more guilty
b) violence against whistleblower, make him do mistakes
c)if a criminal would order violence against himself to make him look more innocent

giving Multiple Reasons at the same time to poison elaborate facts

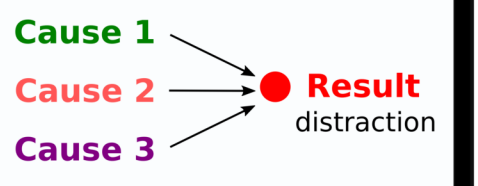


https://0x8.ch/HackersCardgame23 **m122**

Inventor: xxxxx **Year:** ~????

If you would have some "unseen" communication channel like US4877027 or Stimoceiver or Neuralink and something happens like your face suddenly gets burned (see m121 Card) then there are many reasons given why this happened or how this happened. Often only junk and spam that would lead you into the wrong direction. Take a pencil and paper and note all of them down, some of them you can elmininate because there are mistakes in that reason. some you can not, but if you note all the clames and then it would be easy to find the pivot element ($1940sShrink&$herFather) since people tend to use often the same chess pieces and moves.

Attacks that lead to the same problem or to the same result



https://0x8.ch/HackersCardgame23 **m123**

Inventor: xxxxx **Year:** ~????

There seems to be a generic pattern the criminals use to keep things and attacks secret. They attack me with different attacks that all lead to the same result, if you try to prove Cause 1 then they bring facts why it must be Cause 2, so the different causes help each other to keep all causes secret. Not sure if a generic principle of secret services to keep things secret or criminals that are criminal since many decades and just trained to do attacks with such a dirthy trick. But it would definitly imply that the people doing this is organized crime. So there would be some PsyOP or Master of this network, we guess this is "Dr" $1940sShrink and $herFather/$herMother is one of his terrorist teams. So it must be some sort of christian terrornetwork that uses NSA/CIA access
