

Adaptive learning- algorithm that adapts places to hide

<https://0x8.ch/HackersCardgame23> **m145**

Inventor: Satan Year: ~????
Patients their drugs tend to be remote controlled. The algorithm that controls them seems to learn and adapt the places where i try to hide so that i can work without being bugged.
In Königsfelden they always know where the patients are, otherwise they could not bug me permanently. Maybe eye card or maybe something like implanted RFID and the uplink eg. the fire alarm system. Unfortunately a really really bad idea, but maybe we could order the same system as they have here in Königsfelden to temper with... worst case it's not a default system and has unknown addons, in that case i guess in the Workshop near the railways, they maybe have some unused parts...

"fair" "Game"

<https://0x8.ch/HackersCardgame23> **m146**

Inventor: Satan Year: ~????
They always tell you: "it's a fair game", but in fact it is not. I worked ~20 Years in the first market (Swiss terminology for working in non-disabled market). The average wage in Switzerland is 65'910\$. So i should have about 1Mio \$. In fact i have goods in the worth 30,000. I played about twice the value of my 1.5 Room Apartment i lived in for 15 Years. After they took the money, they activated the caretaker that lived 10 years less there that attacked me and then told the homeowner, that i would have attacked him. The Police brought me to the Mental Institution Königsfelden in handcuffs, so i had no chance to go to court, then they told me, it's all >>> your own fault <<< they passed the deadline. The Finishing move of the CIA will be to kill me to blackmail all that took my goods and to blackmail them the rest of their live, and of course this is also all my fault

Swimm

Scout's Place (Maienzug-Zmorge)

Lake

<https://0x8.ch/HackersCardgame23> **m147**

Inventor: Satan Year: ~????
They used the hidden communication channels and told me: If you swimm over the Hallwilersee (about 1-2km) this would be the proof that you are worth her. They showed me also visuals of here \$grandParents House, not sure if that were her \$grandParents, or \$herMother. I swam at night, in the dark, i could have died.
The funny thing was that when i was about in the middle of the lake about 20 big birds flew in a circle about 100m above me. Maybe this is also some tarot card? (see t46).
if she then married another, this would have been definitely a lie, so they just want to kill me based on the fact that they attracted me in 2001 with that prospect (m75)

Bitching through \$herFamily

<https://0x8.ch/HackersCardgame23> **m148**

Inventor: Satan Year: ~????
After Family Bloom attracted me with a computer course (m75), after her daughter (m38, m83) took my heart, after they thrown me out (m45), after i put me in a mental institution (m19), after i worked for 18 Years most of the time 16h not just 8h like normal people do, after they used me for many things as scapegoat (scg*), after they used me also as lab rat (t19, t11, t15)...
Thank you that you showed me who i really am, and if \$onyGirlfriend broke her promise, i think it would be completely ok to own the complete Kanton Aargau with my blood, and please remember to throw my dead body into the garden of Blooms. Aarau and please call the press, or the sunshine press to make a big story to force the people in Switzerland not to do such stupid things...

it's "your" own fault

<https://0x8.ch/HackersCardgame23> **m149**

Inventor: Satan Year: ~????
Tomorrow they possibly will force me to take "anti-psychotics. It's not medicine, it destroys your brain, your intellect, your soul. The older Generation kills you this way. So you will be "reborn" as stupid robot. They will again abuse you as scapegoat, and again you would have to pay the bill for all what the parental generation did. So i wish, that all my tangible and intangible goods will be inaccessible (maths: transitive) for people that are older than the 1970s Generation. And that this Cardgame will be distributed to younger people that would help them to defend themselves against those people that hunts down innocent children in the age of 14 just because they bought an assembly book. And to those that did this to me please repeat the bible: **Thou shalt not kill (Bundesverfassung Präambel, Swiss Justice System kills innocent People)** Dear older generation, please remember this when you end up in hell, and you will be there and guilty.

World Peace Game

<https://0x8.ch/HackersCardgame23> **m14**

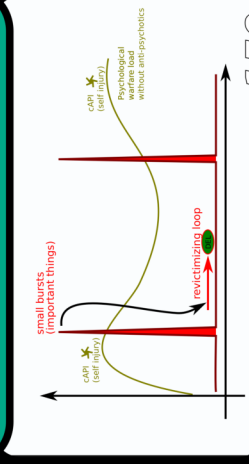

Inventor: John Hunter Year: ~2010
Brilliant didactical model to teach conflict solving strategies to children and adolescents. The goal of the game is world peace.

Honor Your Call John Hunter

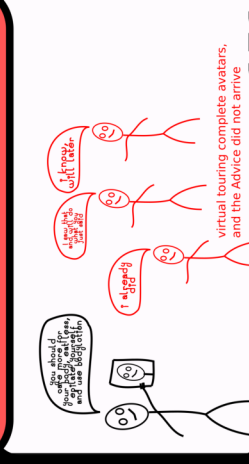

"Anti" psychotics

<https://0x8.ch/HackersCardgame23> **m150**

Inventor: Satan Year: ~????
If i don't have anti-psychotics, there is some baseband load of things that makes me psychotic, and about once a day, the system makes me slap my fists on the head, the reason why i bought a autism helmet. With the helmet the base load is much smaller. This seems to enable immediately after i took the Risperdal (eventrigger on drug). This makes me think that everything is ok. But though there are bursts of bad scenes, and this scene is then looped for about 15 minutes, but then gets down-voted. In my opinion the lower base-load would decrease my ability to cope with such things, since i don't have that much training anymore as without anti-psychotics. The bad scene is then deleted, that is great for not being psychotic, but in this world maybe a "good situational awareness" and training would be better that the patient learns to survive.

I KNOW THAT ALREADY!!!

<https://0x8.ch/HackersCardgame23> **m151**

Inventor: xxxxx Year: ~????
There seems to be some spell or socio psychology design pattern to prevent people from distributing information(s). It samples the same as my own touring complete avatar tries to tell other people, then their touring complete avatars loop {
i know this \$information already
proof 1 that i know already
proof 2 that i know already
i know this \$information already
proof 3 that i know already
}
or shows real scenes from earlier from this person. That makes the manipulating person think, ok i don't need to explain that to him / her. Workaround: use more words and explain more detailed, but then they maybe activate a BI Card, reason could be a mother that would like to keep the kid isolated with such a lack of body care, or wrong behavior...
