They burn a trauma into the victim's psyche, in order to be able to reactivate the trauma. In Rombachtal 11/13 there are so far 7 killings maybe induced with technology, the owner Livit AG threw me out of the apartment as soon as I began to ask questions. Maybe they even ordered \$angryNeighbour to sho bullet hole to distract from the relevant scenes that would bring the assassin-\$hrink / \$herFather into jail. Step two seems to be, that the killer bought the judge, if someone would find the "surveillance" infrastructure, and could proof that this surveillance does not just listen (eg t1, t15 cards), the owner could not deny his complicity anymore, revictimizing of the bullet hole is done with a simple gun shot sound, over eg. t1, t12... card

## Fixation (psychology)

"Fixation" (German: Objekt Fixierung) concept make young people focus on more on things than on humans. So it becomes more easy to manipulate the young people. Additional you could even make the young kids follow a evil symbol system, Patch: Kids learn also Psychological Concepts

**CARD WAS CHANGED IN MENTAL INSTITUTION TO MAKE FOOTBALL CLUBS ATTACK MARC**

Many Social Systems have a Gypsy Cemetery. Initially there would be "only" one dead kid, gypsy... Maybe the one, that was just ignored or forgot by the group. Some older people use things like the m37 card and tell the group to judge the equal aged, then using dt1 card. Even if group said no to m37, and if someone from the older generation pushed that red button the group would still feel bad. An additional problem would be that the older selects the next scapegoat "to protect the group". The falsely accused equal aged would probably find out about that dirty "game". So you would have a transitive (math) situation where all the older people would have to attack the youngest asking [ the right | to many ] questions. It seems that if you ask the right questions that the alleged murderer plays multiple such cards. += Eventtrigger

## Morality

Morality generally refers to the actual action patterns, conventions, rules or principles of individual individuals, groups or cultures. It would be better to say norms, values, categorical imperatives, which serve the general public as well as the individual, the counterpart to egoism. To keep the system stable and create sufficient reserves, so that it does not break, if something small goes wrong and / or become Sodom & Gomorra (Hebrew ועמורה דום).

## Money

The usual rhetorical automatism would be "Everyone has his price" even Judges are for sale. We think "Everyone" is a rumor, i for example would never intentionally do harm to a younger child, not for 100'000'000\$. But many young people do not realize, that their wages actually are paid by Satan. Not informed by the company, that many people had to die for the profit, and if the young employee would ask relevant questions about illegal things company does they would fire him or more worse things like they did to Mollath (Germany) that not even worked there. Many rich people can easily hush murder and rape with money. They even buy the judge that wears a price tag instead of moral and justice.

In the preamble of the Swiss Federal Constitution is written: In the name of God. We can therefore assume that for everything that went wrong. People produced an law article for, and over the years they also produced laws and regulations that benefits a single supplier or cartel for a specific application, (for example, Swiss fire protection regulations) And of course there are also good things in the law, for example having law that specifies how bridges should be built to prevent things like Ponte Morandi (English: Morandi Bridge). Unfortunately many people ignore the law that leads to many innocent deaths. When Justice System is illegitimate or is abused by the powerful, citizens loose faith in the law that leads to more problems. = Whistleblowers

## Conspiracy Theory

One of many conspiracy theories like "Chemtrail" conspiracy, is "offered" by Google, as soon as one falls out of the standard consumer behavior. In fact the photo shows only a balancing test of a Boeing plane. In order to be able to shift the weight of the aeroplane, it has pumps and water tanks. "Switching on the toxic sprays" is simply when the plane enters an air layer with more humidity. Some sort of reverse-exploit to such google queries one could use his native language an redefine the word with "Ciel Voile". What then would mean that it is a parable explaining, that the upper ranks in the mainframe are trying to make the lower ranks having no plain sight in the mainframe.

Eg. the flat-earth theory is just stupid, or maybe just a parable for Terry Pratchett's discworld novels, which tries to explain small and big kids in an understandable way, how a social system "university" works, and that some people trying to steal the Boots of other magicians. Maybe it also describes how Mainframes (AI's) work, in this case the chained Octavo which contains 8 spells (access keys). Or e.g. The librarian (Google) who has been transformed into a monkey => see Google-Query: Porn  
Maybe you should read Terry's Pratchett's work...
