m5

**Inventor: God / Satan**  
Year: ~1200  
v. lat. : students "striving (after)", interested (for), striving for", plural: booze-up. **Socrates** (468 - 399 BC) "Once you start believing you are, you've stopped becoming." / maybe low self esteem driven because of Parents abused their power against their kids => the student has often to work for free, if he invents something great, often older takes it and sell it, and not even give credit instead they intimidate him with non-students or student haters (induced) so that he forgets about the thing he has invented, discovered or made public already.  
Other Use cases; Cleaning (wo)man, firefighter, work with dirty chemicals for cleaning up after a fire, older generation abuse the low self esteem they caused themselves students good & brave students

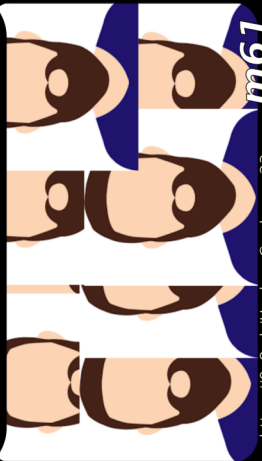

## Location Based Psycho Terror / Psy-CyberWar

m60

includes svg "easter egg"  
One can program events based on the coordinates of the victims. For example if i would be near 1 the annoying janitor would be activated (\* cards) and even attack me. Or if i would be near 2 lot of cars pass by, lot of stupid males that let the algorithms how would "coincidentally" appear. For this algorithm they must know your normal route and the average speed you have with your bicycle. It could also be used for good things, for example at 3 there would always be lot of 20 years old that smile friendly at you. Anybody added me just the red scenes. It is also dynamic, so the "design pattern" eg. number 1 for example could even follow me, making me paranoid. So it's more of a evil design pattern that hunts me and after a while one gets completely nuts.

## Touring Complete Victim

m61

**Inventor: ?????**

One could create a touring complete avatar of the victim or the scapegoat and every time when the jury or his social system would of equal aged would listen to him and begin to believe that he is just the scapegoat, the victims / scapegoats touring complete avatar would start to insult, intimidate the jury or social group, so the group of equal aged would stop listen to him or even begin to attack him. This card seems to extends the m37 card -> dt1 card.  
Technically it would be samples of earlier scenes when the victim or scapegoat was tortured and he said things he maybe just repeated (rawhammer attack of the mind, co2 card). This would give quite a lot of work to create such an avatar, so it would be likely that the scapegoat is even a pedophilia victim. Maybe not all equal aged are driven by the parents generation, but we guess most of them.

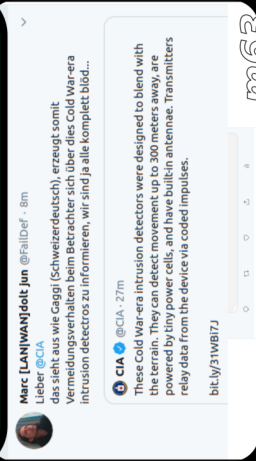

## Suicide Death Bot infection path

They seem to play this card only if one have hardly no money or spent last money to red cross for water in syria. One buys food with last money, and then they activate a old ugly Bot (m48 Card) that eg. touches food, on t.l... they say that a suicide death bot was transferred to your last food. The bad thing is, if you then would eat this food this m44 would be activated. The only workaround i found was to throw this food away. I guess this is how they trigger poor people or homeless people. The victim of this cyber-attack would then maybe attack the person that transferred that malware (m50 Card). Often this sort of Malware spreads to your whole existence and to many of the scenes and objects you own. I heard they use some sort of malware eg. on womans underpants. We should transfer the malware back to the person who transferred it, but uneducated person would run amok.

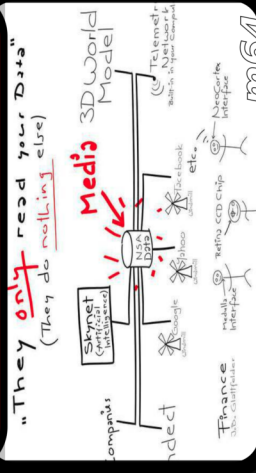

## Induced Avoidance Behavior

m63

**Inventor: ?????**  
Year: ~????  
The CIA seems to put disgusting (igittttt) Pictures on relevant informations (Cold War-era intrusion detectors... that can detect movement up to 300 meters)  
This normally leads to avoidance to inform yourself about what they inform the people who know and abuse this dirty trick.  
And it would be likely that eg in the picture, in the EXIF Data or in a system where only agents have access would be less disgusting content but more informations.  
(https://twitter.com/CIA/status/1189250463276908548 and it would also be likely that this tweet would disappear or would be changed... but you really don't want to click that link)  
And most likely the link would be a HoneyPot for the good people.

## Ways to end up in Mental Institutions

## APPLE-BRAUM

m66

**Inventor: xxxxx**  
Year: ~????  
Its all the fault of the >>>applebaum<<< or the fault of the kid >>>but definitely the mothers fault<<< There are [Mothers/ Vaters] that force their [daughter/sons] to eat from the forbidden tree. There are also Parents that don't feel guilty, so they would not have a reason to force their kids to eat from the forbidden tree. IMHO the NSA/CIA tried to use Jacob Applebaum as Jewish scapegoat. The Applebaum would be a symbol for all those people and sinners that killed an innocent equal aged friend (one out of 80). So the CIA has a reason blackmail and dissociate the left over 79 that "themselves" said yes to kill the "rapist terrorist", but in fact the Neuralink just transmitted this approval and stored the scene in NSA/CIA Data Retention. So we question the honesty of the universities where Jake learned and taught. However, people with names like Applebaum, Applebaum, Appletree would be great opportunity for a generic multifunctional scapegoat satans.
