

Weapon part 2

m52

<https://0x8.ch/HackersCardgame23>

Inventor: xxxxx **Year: ~????**
With Weapon part 1 card they forced me to open my safe deposit box at UBS Aarau (The Police Officers Name: Michael R. & a Women dont remeber name) They photos from the content of my deposit box, just as a "proof" that there are no weapons in my deposit box. In fact this was footprinting and enumeration for to steal my data and to create more suicide death bots against me and us. This was granted possibly by prosecuting attorney Marco Spr. of the Justizdepartement. Aargau, Switzerland. So now SherFather, SherOnkel, SherMother, \$1940sShrink and the whole Canton of Aargau has all my data, and maybe they even used MY diary entry about Michael B. (Grosimörder Aarau) to drive (t* cards) to him run Amok against his Grandmother. I was thinking Michael B. will commit suicide so i meet often with him to deescalate, but i could not when i was in the mental institution when Michael driven

Digital Doomsday fr-097

m53

<https://0x8.ch/HackersCardgame23>

Inventor: xxxxx **Year: ~????**
<https://www.youtube.com/watch?v=k3WcCqJ3qI>
The **Digital Doomsday** maybe already here, at least in some countries.

LRU

1. Good Scene
2. Bad Scene
3. Bad Scene
4. Good Scene
5. Neutral Scene
6. Neutral Scene
7. Bad Scene

Normally people think of the last Scene

Therapeutical use: loop { 1, 4, 5 }

Psychological Warfare: loop { 2, 3, 7 }

m54

<https://0x8.ch/HackersCardgame23>

Inventor: xxxxx **Year: ~????**
Cards used t1, t2, t10, t12 (of also showing content in social media, mail, like the study where facebook showed that they can influence mood customers with only showing good or bad content) it is used more complex too, if the last good scene really stabilizes your mental state they mabe see that with eeg, eg t1, t3, t4, activating things like dt1, dt3 in conjunction with t15 or t19 and playing the loop for the bad things to delete the one last scene that stabilizes you. So you would become psychotic again and they could make business with m49, ... They seem to combine it EEG Fear detection (m57) to automatically target whistleblowers, if they can detect an earlier scene they trigger (t14) even more similar Bad Scenes from earlier

the speaker is lying (Stimulus-Reaction-Habit)

My nose grows now!

m55

<https://0x8.ch/HackersCardgame23>

Inventor: Carlo Collo **~1883**
With tons of bigdata you could easily say if someone is lying. Maybe there is already a system that does that function this to help parents to teach their children well. This would need some Algorithms and some Technology cards and of course some programming language like Prolog. After a while the parents would trust into this stimuli and if the older kid would say, the system is lying but the stimulus that was trained in the parents head says **this is a lie, the system does not lie**, the parents would not believe that the system is broken or that the system is intentionally lying. Maybe a common problem among WhiteHat Hackers. But it became easier since good people like Manning or Snowden provided us with proof. What if **Schizophrenic People** have the same Problem, or at least some of them. **Workarund:** switch from **Inductive reasoning** to **Deductive reasoning**

intimidation

m56

<https://0x8.ch/HackersCardgame23>

Inventor: xxxxx **Year: ~????**
Often the offenders try to intimidate the victim(s). There are may ways they do that, with weapons (m21), with law (c04) with threats against the people i love, with poison (eventrigger on eg. the drink you just had and a loop: "You've just been poisoned, hahaha"), or they tell you "we will put you again in a mental institution where they force you to take drugs that even kill, eg Zyprexa. Often they additionally use the role toggler card (m42) and tell the victim, that he is intimidating the offenders to keep the victim and others busy and confused. (fr-036, the thing that shoots every second) Normally they activate multiple systems to generate diffusion and to protect the single systems of criminals: mental institutions, law system, local people that hacks the victims computer, but also not all (see a12 Card) **Most of the time it's just: psychological warfare but i am careful because i more or less know how they killed Tobias Moser (m46 card)**

fear detection

m57

<https://0x8.ch/HackersCardgame23>

Inventor: xxxxx **Year: ~????**
with Neurosky MindWave you can read attenuation or meditation, so we guess one electrode (t1 card) would be sufficient to extrapolate for example also the parameter fear. And if they would show something like cAPI Card on eg. Facebook stream and would find out that the victim gets paranoid or fears that, they would loop such scenes until the victim tries to commit suicide or runs amok. So this card would be an important element for eg. c06, b01 or a16 card, since the offender does not only want to own or kill the victim, the group would feel good when the **victim is revictimized**, so the real offender would play m37 card on the group for later using the dt1 card against the group, normally if you could prove that the offender he says something like "It's just training", "we only want to help" and a lot similar lies, so question if one of the offender says "it's just training", combined with m54, Workarounds: Listen to music you love, i use wireless headphones to not disturb my neighbors. I guess the music makes it harder for detection algorithms to identify emotions.

strapping psychiatric patients

m58

<https://0x8.ch/HackersCardgame23>

Inventor: xxxxx **Year: ~????**
Mental Institution strapping psychiatric patients. I could verify that in 2007 when they strapped me in Mental Institution Königsfelden, Aargau, Schweiz. The good people in mental institutions they tell that it's just that the patient does not commit suicide. But in fact it is mindcontrol and torture, see Sensory Deprivation. Worst case there are even shinks that would rape strapped young female patients. If you google "**Psycho-The-Rapist rapes patients**" you would get 10-100.000 hits on google search. As we said on other cards, this normally just obfuscates technology cards like t1, t28... the sad fact is that if a patient (no matter if male or female) would have been raped in a mental institution he or she **will try to commit suicide the rest of his / her life**. We did not find a way to fix that behavior.

Symbol Minded Spirit

m59

<https://0x8.ch/HackersCardgame23>

Inventor: Unknown **Year: ~????**
If a person draw symbols it's his psyche is maybe beeing scanned for vulnerabilities to later exploit them. The drawn on the lower left "i" created in Mental Institution (obfuscated by Movie "The Manchurian Candidate") Königsfelden and shows my whole life since i was child. One symbol for each scene i (or dataretention) remembers. If you compare those with symbols of Christchurch & brevik amok, one would maybe see that mine is more analytical, where i try to find things out, and the others are more of one symbol for PR / news. In any case if such things happen there is possibly third person / algorithm that influences. In any cases remove the weapons, no matter if he / she would later commit suicide or runs amok. Different technology Cards, 0-day, if you scans will just take the next victim!
