

Escalation Algorithm

Inventor: xxxxxx
I guess the PsyOP uses the **criminal code** (German: Strafrecht) for Psychological Warfare. Simplest way is that **he would sort the Articles by the length of sentences for a crime**. People would react differently if the sentence would be **one Year** or **twenty years**. Since NSA/CIA would have such Data and it is likely that the PsyOP has access to the **NSA/CIA/NDB Databases**, this would give him some sort of an **expandable baton / Stick (m7)** for **Psychological Warfare**.

Escalation Stage Example:

1. Insult = some Money (Poor People more affected)
2. Illegal Drugs = 0 - 7 Years
3. Theft = 0-5 Years
4. Pedophilia = 0-10 Years
5. manslaughter = >5 Years
6. Terrorism = 0-20 Years
7. Murderer = 15 Years - security custody (m46 Card)

so this would be some sort of proof that \$1940\$shrink kills Robies Hoiser

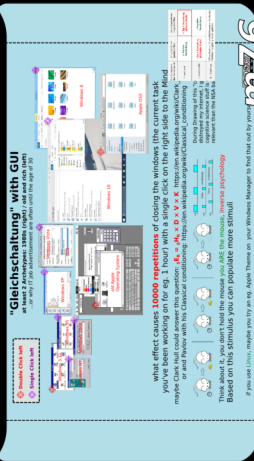

Genius Wanted hopefully alive

Possibly the black world (also called Economy) found out as early as 1999, that OpenSource movement or Creative Commons has the better ideas than people working for money. So it would be likely, that they tried to own young people that live in the Open Source Community. They let the young people do what they like, but if the young Nerd or She-Nerd has a good idea they steal the idea, claiming that the idea is their intellectual property. Even erasing the Nerd in Mental Institutions with drugs that he forgets about the fact that he initially invented it. **As Open Source Community we would have an eye on that.** Derivation of this Thesis can be found on https://marciandot.ch/mi_buzzernet/2011/01/30/schamhaare-hoden-epilieren-beim-mann/ (sorry German) Maybe the "Linux: It's a Marketing Problem" might be a overloaded Symbol (m69 card, several meanings) too.

Principles of Behavior Stimulus Response Habit

<https://0x8.ch/HackersCardgame23> **m76**

Inventor: xxxxxx
Year: ~????
Formula from Clark Hull describing how programm Stimulus-Response-Habits. Today it is "possibly" implemented in software. The sort of Deprivation or the Stimulus would maybe change randomly. The "psychology/keys" would be the same. The communication channel (t, t... cards) are maybe randomized too and worst case they would do things like frequency hopping. **Psychological dimension:** things like **exposure time**, for example 17 years torture or "white" torture after an initial great user experience (m38 card) would be important too. (to my equal aged mistress: "user experience" just fun). They also generalize things, first I feared gun-shot noises, then firework, today I fear every single noise. This seems to be one of the main weapons to prevent innocent victims from leaking the truth or if people like me try to warn other people from this sort of attacks and that they could protect themselves eg. with earplugs or Noise-cancelling headphones

faith detection

<https://0x8.ch/HackersCardgame23> **m77**

Inventor: xxxxxx

with **Neurosky MindWave** you can read attenuation or meditation, so we guess **one electrode (t1 card)** would be **sufficient to extrapolate for example also the parameter faith**. This card was added after I leaked m57 Card... There seems to be an algorithm, that records what one is doing for example during a week, saves the good scenes and then **tries** to create a Suicide Death Bot with this inverted good scenes.

Additionally they seem to drop all connections from the victims t1 to other allies, so no-one could help.

Workaround: Listen to music you love, I use wireless headphones to not disturb my neighbors. I guess the music makes it harder for the detection algorithms to identify your emotions.

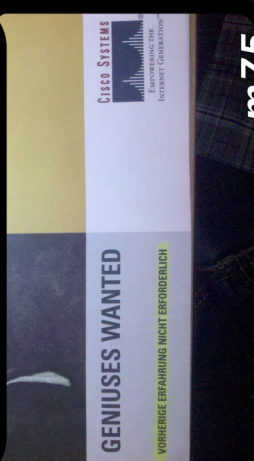

Locked Notes Part 2

After a while, \$Shrink shoots to many CyberWeapons / electronic / Warfare Socio-psychology-Design-Patterns at me and locked them. As soon as I would like to protocol them he or his automated targeting system shoots more at me. I guess like real 0days for eg. Software or Operating Systems they don't have unlimited of this socio-psychology Malware. So he must prevent that I disassemble them. Otherwise we could patch them. Any idea?

Locked Notes

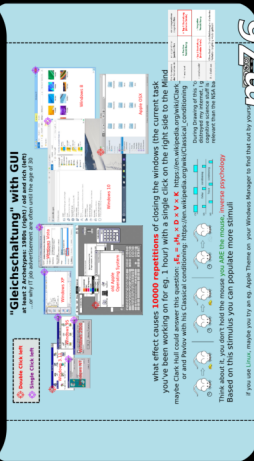

<https://0x8.ch/HackersCardgame23> **m78**

Inventor: xxxxxx
Year: ~????
They can lock notes you made. They know maybe about the notes because eye1 card. Algorithm would be something like:

- Neighbour knoks on wall && at the same time pain in the eg. in the chest implant is activated.
- induced rage card. eg. if you use electronic device
- loop recorder { do something else }
- loop recorder { begin with the first, no the second ... } (a7 card)
- pain frontal lobe enables
- go through all register cards in browser!!!!!!! (a17 card)
- drink something / eat something / smoke (smoke1 card)

-> so maybe it would make sense to work on the notes....

Untreue revictimizen

<https://0x8.ch/HackersCardgame23> **m79**

Inventor: xxxxxx

Sohn dazu gesteuert ersten Liebe der er ewig. Treue geschworen hat untreu zu werden, aufzugeben. Nächste zu nehmen. So würden **Vater der Sohnes** mehr Macht über die Grosskinder geben, denn sie könnten so Sohn mit indutierten Tat dissoziieren & fremdbestimmen. Grosseltern die Grosskinder solche Bonbons geben die das revictimizen (Bild) würde dabei helfen den Vätern mit Hass die Sicht auf die Kinder zu nehmen. Psychologische Kriegsführung? "Freundin 1 steht klagend an der Bushaltestelle" wäre somit indiz für **Vorsatz der Grosseltern!** Die **Grossmutter würde allenfalls die Ehefrau des Sohnes dazu anstiften dabei mit zu machen?** Einlenken, klein bei geben, insgeheim schauen dass der Ehemann nicht zum BOT / Haschschachinen / Alkoholiker etc umfunktioniert wird. Vater als Weifer Es würde auch so aussehen, als ob die Kinder dann das Leiden des Vaters (Krank, Zinn-O) konsumieren und das sie CIA so versucht Informats Security Messchen weltweit gefügig zu machen um zu dissoziieren falls die CIA/NSA/ISP-Malware finden. "Was her er, zwof". Also die (Gross-)Väter zwingen die Söhne zu und in dieser einen Tat (1. Untreue) die nicht mehr zu sehen und allenfalls den 1. Partner in den Suizid treibt und gegen alles das, was Frauen heilig ist zu Soldaten Satans zu machen. Aber es ist noch komplexer. (Mikropunkt)

Stick (German: Peitsche)

The brain automatically says: pain / injuries are bad. The brain tries to prevent the pony from situations where it feels pain again, so the scene that caused PAIN will be burned into the longterm memory and in the future automatically avoided (avoidance behavior)

Physical violence against children is prohibited by Swiss Law but unfortunately still very common. This effect is (ab)used in Behavioural "Sciences" = to boss people around for "efficiency" reasons instead of educating them. The consequences are often a PTSD that maybe can not be fixed at all. So it will continue to avoid the people that caused pain, but has probably no PTBS if it plays with equal aged Ponies.
