**DON'T JUMP, you can jump later**  
first find out if the reason to  
jump is true or "just"

On my balcony there seems to be an eventtrigger that is shown on something like Stimociever or Neuralink: "Jump Now". To prime they run things like JustPrimeNoctis (m38) and activate the Active Denial System (t15) or trigger my amygdala implant (b1). I often tried, but I had luck so far, I not yet jumped, but almost. They seem to train this habit with cards t2, t1, t7, a16, m32, m44... one could know when to start this algorithm with just positional data (eg GPS, m60), if victim has body telemetry (2 RFID Chips or 2 resonant circuit in the head/skull or retina CCD (a19), they could even calculate what the victim is currently looking at to trigger this event (t14). Maybe fear or faith (m57, m77) of the victim is also added to this algorithm. If I have a spinalcord implant (t6) maybe this prevented my death, but if this would be hacked I could not even prevent my death.

## Induced Depression

If you have a depression it is not uncommon that you just sit on your couch and can't even move. We think it would be technically possible to induce a depression, for example with the fear detection card (m57) and some sort of "bioresonance" based on your BigData Entry and maybe LRU card (m54). I found out that in my case I can "hack" my depression, if I don't try to fight against the induced depression but if I try to extend the depression and listen to some really really depressing music. Maybe those who write the mainframe code for induced depression forgot to write this code too. So I become aware, and the depression has less influence on my psyche. The good thing is that I then somehow get access to the BigData and can begin to disassemble the data. Not sure if this works also if induced by chemicals that influence the neuro-endocrine system? unknown: or the "depression detection" says: "he feels enough PAIN now" don't need more BigData & LRU?

## "Enlightenment" with Drugs

When I was 20 Years old 3 "friends" used peer pressure over a period of 6 months to make me consume Ecstasy in our Music Studio below a (stereotype) Gym. We also watched the movie "The Matrix", in the end they succed. After that Scene the t1 card told me, that I now must "enlighten" also the equal aged Girl Rahel Sc. (they wanted me to fork, so I would have been guilty of ruining someone's live too and then I did not. Then the t1, t2, t6, t11... Cards also told me to put some XTC into a bottle in my parents fridge, I did almost, but I did not. I guess the suggestion they used was, that my parents have a less technical / scientific background, so I substance to "enlighten" them as a gift. It was even the same wanted to "enlighten" already consumed, so I was not thinking about that I could have poisoned them, but I possibly would. Relevant: intended / implemented to fork to other people, so switzerland's Society is under attack since before 9/11.

## Twin Towers 9/11

I guess a lot of people knew that the twin towers will fall. In my opinion very likely that the people from CIA knew. If you look at m95 the "war on terror" would have obfuscated perfectly that the CIA begun to undermine Switzerland since 1999 or even since 1968. This two Bastei ARTWORK Collection glasses I got from \$1955MarketingGuy @ 88B Flexible Automation AG, ZH Altstetten in the year 2000. When he gave them to me as a gift he said something like: "This Glasses will be precious in the near future". With just a bit of imagination one could the two glasses that were in a nice blue cardboard as the twin-towers with the holes from the airplanes. When I Asked \$herFather / \$herMother (there was a time when I trusted them) in 2002 what they think about my theory. They said "no, no of course nobody knew about that the twin-towers will fall". What they said seemed to me like a very very cheap lie. As soon as one begun to question the official version people begun to discredit or even attack.

## Good Gamification Bad Gamification

Many things can be implemented as game. Also m91 card. Eg games that makes people learn things, question things, research things, prove things are possibly a good thing. Satan knows this principle to upload content to the brain of people too. For example the games to blow up things (even if only virtually) are maybe not the best type of gamification. Best Case it would just be a stupid game, worst case it would have an effect on the real world and maybe even kills people. There is also something in between, where the kid then would blow up something synchronized with a real event, but only correlation but not causes. This would have at least two effects on the kid, he would feel guilty and could be blackmailed with that event, even he is not the cause, used to dissociate and then boss around the kid with "his" deed. It gets really complicated, when satan puts bad games functions into good games, if the kid is verbose it's easier to debug, but the kid then also has a bigger attacking surface,

They started a new "strategy" they use the a27\* Cards Array/List<...> cards) to influence when and how fast I do things. Especially the use case of "leaving my apartment" always pops tons of things I graylisted.

Mitigation:  
plan additional time for this stuff but with algorithms like behavioral prediction they would again try to adapt the additional time you planned...

There are overlay Maps on all 3D models, even the "map" of your brain.

**Corona Layer**  
(that's maybe infected with corona and you just distributed it in your complete apartment

**ScapeGoat Layer** (mostly younger people) (the younger cashier guy just stole a product -> m199)

**The Product is poisoned**  
(activated mostly in Shops to waste my time)
