Gifted, held in prison to make him and the others fear. In this case, Colin James Farrell, who presumably was identified in *psychology tests* as a man "who will once make trouble". For example in a test like mmp2 the parameter "feels responsible to leak the truth to the society" would stand out. For the Mates it is Psychological even more worse to see how he is tortured. Being the one that is being tortured becomes normal after a while. But the mates should stand up and say "stop that torture", but those who would stand up would possibly be upgraded to a captive too...

Judge Archetype

The role of the judge is one of the most powerful in the system, in many movies shown as a fat "cute" Santa Claus. The role / chess piece would be perfect for a mastermind of a military dictatorship. If the judge and the jury is controlled by technology cards the accused would not get a fair process and nobody would even find out who decided to kill the accused, even if he is innocent. Weakness would be the a15 card, it would also be perfect for a foreign aggressor, secret service to subdue the whole system. In "To protect and infect part 2" (12:17) @ioieror says "is not clear to me, that a judge would understand anything I just said", but thats wrong: that one does not use a15 card implies, that he knows, that the accused is innocent.

Since the Roswell-Incident, the CIA possibly tried to keep illegal Human Experiments secret and told the people and victims that such incidents were Aliens "attacks". Those who found out tried to find a way to protect themselves are thrown out of the society. Because tin foil would possibly block things like the Stimocoiver implants, they started to discredit this archetype in Media as a Crazy Person. Not sure if tin foil helped at all, possibly depends on frequencies and transmitting power. We should pay some tensor-magicians or better enslave them to calculate this for us for free.
Image: An Example of this archetype, discrete without tin foil: Henry Starling in Star Trek Voyager S03E08.

Since the Roswell-Incident, the CIA not just started to cover illegal Human Experiments with Alien Stories, they also actively hunt those, who could be able to leak details about the abusive system. In this case "Man in Black" or "Enemy of State" (just outdated technology Stuff so they gave it to the world and the Faraday Cage is not really a Faraday Cage...) greetings to Will Smith, b2w. the movies are cool for young boys except that detail.
Point No.1: No it is not sexism, the boy would be more stubborn
Point No. 2: Don't buy Assembler Books when your 14 Years old, see dt2 card
Point No. 3: Nor the girl would be on the dark side
