

Emperor

ra3

The Big Five Year ~500

- N Neuroticism: calm, ignorant
- E Extraversion: arrogant
- O Openness: fears conspiracy
- C Conscientiousness: killed by the state
- A Agreeableness: high

Main Achievements

wars, slaves

Brief Profile

- Humanism: ****☆ (1/5)
- Technical Background: ****☆ (2/5)
- Megalomania: ****☆ (4/5)
- Military Background: ****☆ (4/5)
- Project Problems to Patients: ****☆ (4/5)

Jesus-Archetype

ra4

The Big Five Year 0

- N Neuroticism: low, maybe in pursuit
- E Extraversion: with attitude
- O Openness: high
- C Conscientiousness: high
- A Agreeableness: very high

Main Achievements

charity

Brief Profile

- Humanism: ****☆ (5/5)
- Technical Background: ****☆ (2/5)
- Megalomania: ****☆ (1/5)
- Military Background: ****☆ (0/5)
- Project Problems to Patients: ****☆ (1/5)

MALE SLAVE

ra5

Inventor: xxxxx Year: ~????

The main problem if chastity belts (no matter if real or virtual) is how to get rid of them. Tools does not seem to work here. <insert> maybe maic just should not have created the ra2 card.</insert> <unknown> unfortunately you can "not" buy women chastity belts.</unknown> <me> unfortunately you can not order such things for women, because you would get again m41 card.</me> Braking up with the promis man normally give their first girl could maybe help for virtual chastity belts but because of the m38 card, that means if the JusPrimeaNoctis Suicide Death bot was only virtually created software the girl i love and i promised to be true forever would have the same situation and then for sure it would be real. Can not verify so far if this is real or virtual.

Scapegoat 1 (Soldier)

scg1

Inventor: xxxxx Year: ~????

To call soldiers "scapegoats" would be wrong. Everyone with a weapon has power. And power tends to be abused.

I don't want to put this image here, but since it seems to disappear on the internet and since it is of historical value to show what military often does to the smallest i put this in my repository.

if you watch the "Collateral Murder Video" and listen to the soldier you will find out, that also 50 Years later nothing changed except those like Chelsea Manning who spoke out what is currently going wrong in the US Army.

Scapegoat 2 (Gamer)

scg2

Inventor: xxxxx Year: ~????

Young people play games for fun, for having a meeting with friends over Teamspeak/Mumble (maybe mainly to discuss about Computer Science Stuff)

But there are also situations where the game or additional software tells them that if they win the game they would win things like women, money, degree... this wishes then maybe never become true

Later the people who added these features would tell that because of this headshot or nemesis pin with knife a real person died (dt1 card) so better focus on the Computer Science stuff.

Peppi Drug Scapegoat

scg3

Inventor: xxxxx Year: ~????

Like in the Movie "Das Kleine Arschloch 1+2" some people tend to do drug experiments with equal aged kids or people. Like the g4 Card it obfuscates the technology cards. The Victim then has possibly 10+ Years fear and PTSD because of the things that were made with him / her. In fact it are not the drugs, it are those technology cards and most likely older people than the equal agade kids that made this experiments with "peppi" (the dog). It is complicated to forgive those equal aged kids, because they maybe(?) feel bad what happened with the kid, so they tend not to talk to this kid, so it becomes more paranoid. Maybe the played m37 card and there are already some dead equal aged kids, so satan plays dt1 card already.

IT Soldier Scapegoat

scg4

Inventor: xxxxx Year: ~????

What, if the system controls the controllers for having a scapegoat to protect the system?

IT Supporter Scapegoat

scg5

Inventor: xxxxx Year: ~????

Computers are highly complex, nobody understands really what a CPU does in detail. Also Operating systems are complex, if you would take an average Operating System you would have at least 5GB, 1GB would be 500'000 A4 Pages that would weigh 2500kg, so if you would multiply that with 5 one would easily find out that nobody could handle that. Therefore the companies invented "The IT Supporter", in the early days they got a lot of money, today not anymore. So if something goes wrong or even someone dies because of the companies computer network the 20 years old IT-Guy will be the Scapegoat and even sentenced. If you add the complete content that is handled with a computer it are more Exabytes than Gigabytes. So definitely nobody can handle that. But of course the 20 Years old IT-Guy will be held responsible, even if he is the one with the smallest salary like i had in 1999 at ABB Flexible Automation, ZH Alstetten. And if you would tell what happens at such soft of companies they maybe even kill me. CIA/NSA would disable malware if the supporter analyzes the problem to keep the malware secret. Maybe even faster interacting BOT that eg interact with sexual integrity of equal aged women since CIA would "not" attack women.
