

Lion

S4

<https://0x8.ch/HackersCardgame23>

Inventor: xxxxx
Year: ~????
 The **carnivorous** lion symbolizes the Alpha Animal in a (a)social-system. In Economy these are often trend-setters that make their followers buy things they don't really need. They use the an **satans global marketing infrastructure** that unfortunately also kills **innocent kids** in the 3rd world but als eg. in switzerland a you see on card m46. Being in your circle of equal aged people is normally **much more satisfying** but the infrastructure tries to split them with eg. sk1.& b1. co6. co7. m37 -> m46 -> dt1.... Maybe usetrif as bad example or as carpet. (note, hopefully this picture represents a faux fur lion, so no animal had to die). The "master" lion seems to create other lions as scapegoates but also to make them defend him and his **Hitler-Mental-Operating-System**

Loop Recorder "Dormiphone"

Infinite loop
With suggestions

Activation-Times

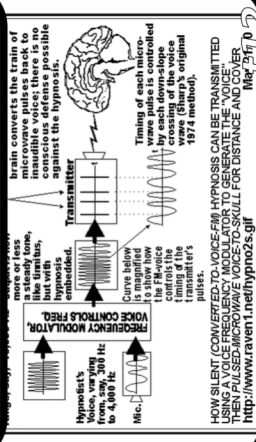

t10

<https://0x8.ch/HackersCardgame23>

Inventor: Petron Corporation (1933) ~1952
 An **analogue continuous tape**, where one can record suggestions such as e.g. $2 + 2 = 5$, which is **automatically activated at certain times**. The tape will automatically turn off after 5 minutes. With digital Equipment (computer / mobile phone / IoT) one can realize more complex systems. And there are possibly also several different cannels. (see cards t1, t7, t3, t12)
 During the night: overwrite things (c05 card) or learning things while sleeping, eg. foreign languages, unfortunately you can also upload a complete (wrong) world view to the brain, or **antagonizing world views** or dogmas to split society into two groups that **fight each other** (see card m50, or eg. ma5 vs ma6)

Microwave Hearing (Frey Effect)

Inventor: Allan H. Frey (Cornell Uni) ~1961
 "He Hears non-existent voices, hahaha", **invisible** communication channels, **pulsed microwaves** received directly by the cochlea. The exact frequency found by scanning through the possible frequencies, if the victim puts his hand to his ear ("tinnitus"); **Automatic Behavior Recognition**. Was 30 Years not patented until 1989 under US4877027. Technically it would have been possible to do this maybe already with electron tubes (~ 1900). Psychological Perspective: people that abuse such technology would keep that secret and previously labeled as a "Schizophrenic" the victim is completely defenseless and it is likely they induced **suicide** or **amok**. In combination with e.g. a loop recorder, see also co2 Card, the perpetrators often caused permanent damage in the psyche of their victims; **PTSD** (#Verdingkinder / #Schwabenkinder / #Slaves)

moved to c1

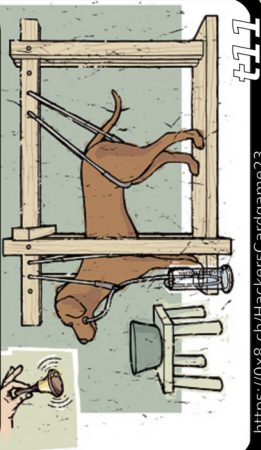

DELETED SCENES

Inventor: ~????
????????

<https://0x8.ch/HackersCardgame23>

Classical conditioning

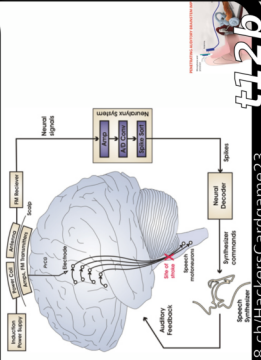

t11

<https://0x8.ch/HackersCardgame23>

Inventor: Iwan Petrowitsch Pawlow ~1905
Step 1: Conditioning eg. 1000 repetitions
Step 2: (ab-)Use **Page 1, Aggression to Amok**
 Mathematical NOT
 acoustic, visual, lights, colors, emf, t1 card...
 People and Animals, to **help and protect** but unfortunately also **for things like at1 card**
 Computers can be used for that

Microwave Hearing (Frey Effect)

t12b

<https://0x8.ch/HackersCardgame23>

Inventor: Allan H. Frey (Cornell Uni) ~1961
 The seem to delete this sort of content and to replace it with violent porn to discredit me...
 ...but the forgot at least one copy...

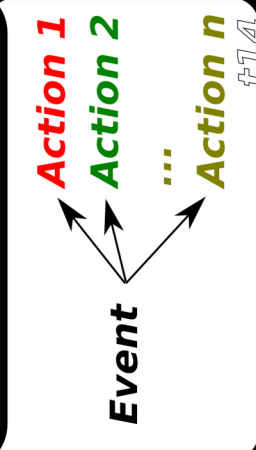

Active Denial System

Inventor: US Air Force ~1980
 The Active Denial System roasts the top layer of the skin at a distance of 500m. For a range of 5 m logically more than 100 x smaller, small enough to fit in a cell phone. Actually, 1930s electron tube technology, but today you can do this also with semiconductors (Esaki-tunnel diode). Maybe one could do the same thing directly in the CPU with Army-Grade Crypto, since the radiation power reduces to the square of the distance, it would be quite small. The "Active Denial System" - denial would thus be the natural archmehesis of a TinFoil-hat
 At a rangen of 500m one could terrorize lodger and if it would have been coupled with the victims computer and there are additional some algorithms one could drive the run amok. See cars: t1, t10, t12, a16, at1, b1, e1, e5, m13, m19, m32, m46

EventTrigger

Inventor: ~????
 Specific Events can trigger Actions, GPS Data, Data from acceleration sensors in handles (for example specific roller coaster) Events could be Sounds, turning on Light-switch (maybe evaluated by smartmeter and the a list of what device uses how many watts), images, Automatic Behavior Recognition, websites (URLs), Buttons or Mouse gestures on a computer, Handy or even if you draw a circle with your hand in the air. One can recognize events with AI (Pattern Recognition, Deep Learning...)
 For Example if sAngryNeighbour would have fired illegally with a weapon, this event would have been recorded and caused an event in a Gunfire locator system [1]. Concerning sHerfather (statement not verified yet) are the 1960s those who programmed the triggers against mar jr landolt, after they programmed those triggers they run in auto-pilot mode and they cant delete it (auto-pilot = allegation)
