

Group Policies

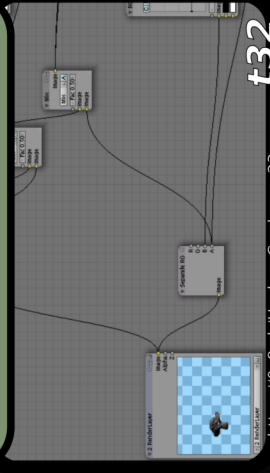

t31

https://0x8.ch/HackersCardgame23

Inventor: xxxxx
 On Windows you can deploy group policies to a complete domain. People that are some sort of wannabe hitters would enjoy it to impose their will upon others. I felt also cool when I was about 25 Years old that I am the "Master" but in fact I was just the scapegoat. Not quite sure if those who deploy things like a16, m50... to people or to a complete group of people are just older people that are using some similar software or if eg m50 card is deployed on all domains. eg by the NSA/CIADSM5.
 Giving a young whitehat hackers drugs like zyprexa or illegal drugs (GPTs Matrix Red and Blue Pill) would let them to think, I must have been infected when I ate this.

Loop Recorder Part 3

t32

https://0x8.ch/HackersCardgame23

Inventor: xxxxx
 Like t10 or t23 a game engine (here Blender 3D) is also some sort of t7 Card, but it's not just a loop, it are more event-triggers (t14) or state machines (co1), for example if I leak about this sort of things a16 card is being activated against me. They often use an event in real live to create this story, you would focus on the initial scene and the person instead of technology. And possibly with AI / Deep Learning (a11 card) prerendered AI or genetic algorithm that learns. The card is in neutral gray, because you could use such technology also for good things but in my case they abused it more like weapon or "white" torture against me, that wants to kill. Book Errebos. The algorithm would maybe also try to isolate whistblowers and whitehats that could be as simple like an inverted F=TYSr Card (Alex Wissner Gross) formula, not keeping all people connected but isolate some or even all.

Industrial Automation

t33

https://0x8.ch/HackersCardgame23

Inventor: xxxxx
 If a person has to do all day the same, it is likely that these moves are burnt into his psyche (not even an implant required) if you would give a stimulus (eg high noise sound at 15kHz, 16kHz, 17kHz...) you could link this move to a stimulus: t2, t11, formula see m76 Card.
 So it would be likely that not only people like me that worked in robotics (t22 Card) are affected.
 It would be the same like m70 card or in combination with m70 card.

hiding data and evidence

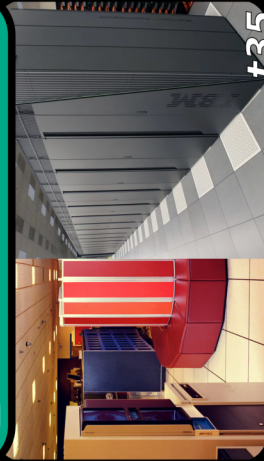

t34

https://0x8.ch/HackersCardgame23

Inventor: xxxxx
 As a younger person one has almost no possibility to store evidence in a way the older criminals can not find or delete. Especially if you would have an eye1 card they would know where you hide things. But if you have for example a big library you could take an SD-Card (I don't trust SD-Cards) or a USB Stick and take of the housing, then you can put that in a book from a library, if you close your eyes and select a random book you don't even know by your own then it is stored and even you would have to search a while until you have the stick back, but the older criminals would have to search too. If they know about that, they maybe start to search too, but then you can prove that they are actively searching for evidence, so you can call the police and make your case.

CIA MAINFRAME

t35

https://0x8.ch/HackersCardgame23

Inventor: ????
 ... it installs all the nasty cards to the people in Switzerland but distributed, second it would maybe not be that intelligent. It seems that CIA begins to blow up his PsyOps after one found that PsyOP creates multiple Death Circles (see mos' cards) It would be likely, that the PsyOps have contacts to the CIA network. "Cyber Blitzkrieg" (we translate what the CIA would like to say: it are the >>>Nazis<<< um the Germans and no, no the cia does not actively obfuscates qtrre, quantum inserts, TURBINE and TARMOIL) But we guess that there are some sort of batch jobs that owns systems globally, not only computers or mainframes, but also routers, handies or the Swiss INTAL... Who writes the interfaces? Kerberos? We need to find out what devices can access Stimocelver, Neuralink... Worst case most enduser devices have some sort of SDR devices that can access t* cards. In this case we need to find out what devices, second thing what we could do is preventing things like NROL-39 Kraken... third thing we can do is to teach people Psychology

(Cyber-)Isolation Cell Padded Cell

t36

https://0x8.ch/HackersCardgame23

Inventor: ????
 Mental Institutions have Padded Cells or Isolation Cells where they put patients in. I was several times in such a Cell, the funny thing in Switzerland is, that the padded cell is not even padded. They say it's for people that would like to commit suicide, they even lock victims with straight jackets. It's about sensory deprivation, sensory deprivation is psychological violence or also some sort of behavioral "sciences". IMHO it would be better to put the people who victimized the victim into jail.
 They do the same thing with your contacts, there are several ways to isolate people from their social network and even from their family, I'm not quite sure, but I guess if they put you in a Isolation-Cell, the Network automatically isolates you for example also in your Social Network or the Internet. On the other hand empirical value can't be taught

ICD10 - F44.X Chess Clock

t37

https://0x8.ch/HackersCardgame23

Inventor: ????
 IMHO there's sort of Cyber Mainframe Chess Clock that puts people into dissociation state, makes them blind for certain things or people, even if would live in same appartement. Technically one could implement that with "Behavioral Sciences" also known as torture. If you cause strong PAIN (see microdot below image) as soon as the one you love is in sight (eye1 card), maybe linked to an additional Stimulus (accoustic, visually, implants...) things or people might be invisible <insert>for the person that should not have read the PAIN diskaag</insert>. Worst case: "used" to rape young boys & girls; best case: helps to GUARD the world, since we don't know expect the worst: I don't have prove yet, but there was a two seconds scene I can remember in mental institution, where she stood in front of me and I was on my knee having "some" pain, as soon as I have prove or hacked it with the microdot I will maybe create a card in hackers card game, unsure if hack would be blue or red team

Infrared Ray Weapons maybe in every Display

t38

https://0x8.ch/HackersCardgame23

Inventor: ????
 In my opinion this terror attack against me uses the m123 card
 -> seal the closet
 - Infrared laser
 -> maybe in acer display, add polarization filter
 - active denial system(s) that roast first layer of my skin
 - maybe in combination with chemicals on my skin
 - or chemicals that was put into my body lotion, or
 -> no solution yet
 obfuscated with chemitrodes that stitches that seems to be placed in the skin / face too
